3. SETUP AND ASSEMBLY

The Golpart Garment Rack is designed for straightforward assembly. Please follow these steps carefully to ensure proper setup and stability.

3.1. Assembly Steps

1. **Install Plastic Clips:** Ensure the flange of the plastic clip fits into the groove on the pole. Follow the arrow directions (upwards) on the plastic clip. These clips are crucial for anchoring the shelves firmly.
2. **Assemble Wire Shelves:** Slowly slide each wire shelf down onto the poles until the 4 sleeves fit snugly onto the pole. The end with a notch should face downwards.
3. **Adjust Shelf Height:** The wire shelves can be adjusted up or down to your desired height by repositioning the plastic clips. Ensure all clips for a single shelf are at the same height for stability.
4. **Attach Hanging Rods:** Secure the hanging rods between the designated poles.
5. **Attach Hooks:** Install the accessory hooks to the side of the rack as needed.

4. OPERATING INSTRUCTIONS

The Golpart Garment Rack offers flexible storage options. Utilize the adjustable shelves and multiple hanging rods to customize your storage space.

- **Adjusting Shelves:** To adjust the height of a wire shelf, remove all items from the shelf. Release the plastic clips, reposition them to the desired height on the poles, ensuring they are level, and then re-secure the shelf.
- **Utilizing Hanging Rods:** Hang clothes on hangers directly onto the four provided hanging rods. Distribute weight evenly across the rods to maintain stability.
- **Using Hooks:** The included hooks are ideal for hanging smaller items such as belts, ties, scarves, or bags.
- **Weight Distribution:** While the rack has a high load capacity, always distribute weight as evenly as possible across shelves and hanging rods to prevent tipping or structural stress.

5. MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your Golpart Garment Rack.

- **Cleaning:** Wipe down the metal surfaces with a soft, damp cloth. For stubborn dirt, a mild soap solution can be used, followed by drying thoroughly to prevent rust. Avoid abrasive cleaners or harsh chemicals.
- **Inspection:** Periodically check all connections, especially the plastic clips and pole joints, to ensure they remain secure. Tighten any loose parts if necessary.
- **Load Management:** Adhere to the maximum load capacity of 800 lbs for the entire unit and 80 lbs per hanging rod. Overloading can compromise the rack's stability and structural integrity.
- **Placement:** Place the garment rack on a flat, level surface to ensure stability. Avoid placing it in excessively humid environments to minimize the risk of rust.

6. TROUBLESHOOTING

If you encounter any issues with your Golpart Garment Rack, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Rack is unstable or wobbly.	Uneven surface; loose connections; uneven weight distribution.	Ensure the rack is on a level surface. Check all plastic clips and pole connections for tightness. Redistribute items evenly.
Shelf slides down.	Plastic clips not properly installed or damaged; overloaded shelf.	Verify plastic clips are correctly snapped into the grooves and facing the correct direction (upwards). Reduce weight on the shelf. Replace damaged clips if necessary.

Problem	Possible Cause	Solution
Difficulty assembling.	Incorrect part orientation; clips not fully engaged.	Refer to the assembly instructions and video. Ensure plastic clips are fully closed and aligned with the grooves. Do not force parts.
