## Samsung SM-R950NZKAXAA

# Samsung Galaxy Watch 6 Classic 43mm Bluetooth Smartwatch User Manual

Model: SM-R950NZKAXAA

## INTRODUCTION

This manual provides essential information for setting up, operating, and maintaining your Samsung Galaxy Watch 6 Classic 43mm Bluetooth Smartwatch. Designed for a classic look with advanced features, this smartwatch helps you track your fitness, monitor your health, and stay connected.

## WHAT'S IN THE BOX

---

Verify that all items are present in the package:

- Watch Body
- Watch Strap
- Charging Cable

One band included. Availability of models and colors may vary by country or carrier. Image simulated. Actual product may differ from the image.

*The package contents for the Samsung Galaxy Watch 6 Classic.*

## SETUP

---

### Initial Setup and Pairing

1. **Charge the Watch:** Connect the charging cable to the watch and a power source. Ensure the watch is fully charged before first use.
2. **Power On:** Press and hold the Power key (usually the top right button) until the Samsung logo appears.

3. **Install Samsung Health App:** On your compatible smartphone (Android 8.0 or later, 1.5GB+ RAM), download and install the Samsung Health app (version 6.22 or later) from the Google Play Store.
4. **Pair with Smartphone:** Open the Samsung Health app on your smartphone and follow the on-screen instructions to pair your Galaxy Watch 6 Classic. Ensure Bluetooth is enabled on your phone.
5. **Complete Setup:** Follow any remaining prompts on both your watch and smartphone to complete the setup process, including setting up Wi-Fi and other preferences.

## OPERATING INSTRUCTIONS

---

### Classic Style & Rotating Bezel

The Galaxy Watch 6 Classic features a physical rotating bezel. Rotate the bezel clockwise or counter-clockwise to navigate through menus, scroll through notifications, or adjust settings. This provides a tactile and intuitive way to interact with your watch.

### Fitness Tracking & Personalized HR Zones

The watch tracks various fitness metrics including duration, distance, and calories burned. It automatically recognizes activities like running and swimming and can track over 90 other exercises. Utilize personalized heart rate zones for targeted workouts. The watch scans your health data to provide HR zones tailored to your fitness level, helping you maintain the optimal heart rate for your goals.

# Wake up to our most advanced sleep coaching

*The watch display illustrating personalized heart rate zones for effective training.*

# Workouts designed by you, for you

Personalized HR Zone is available only for running workouts. Requires initial setup of 10 minutes of outside running with GPS on; smartphone with Android 8.0 or later, 1.5GB or more RAM and Samsung Health app version 6.22 or later.

*Workout tracking interface on the Galaxy Watch 6 Classic.*

## Advanced Sleep Coaching

Gain insights into your sleep patterns with Advanced Sleep Coaching. The watch can help you plan your bedtime, detect snoring (requires phone within 2 feet with snore detection enabled in Samsung Health app), and track your sleep stages (awake, light, deep, REM) to help you develop better sleep habits.

**Put your style  
on display**

Select interchangeable watch bands sold separately.

*Sleep tracking and coaching features shown on the watch display.*

### **Heart Monitoring**

The watch continuously scans your heart rate to detect irregular rhythms that might be indicative of AFib. The ECG Monitor App (for adults 22 years and older, requires Samsung Galaxy Smartphone with Android 7.0+ and Samsung Health Monitor app) can analyze pulse rate data and provide notifications for irregular heart rhythms. Consult a qualified healthcare professional for any medical concerns.

### **Body Composition Analysis (BIA Sensor)**

The advanced BIA sensor allows you to track body composition based on weight, body fat, body mass index (BMI), skeletal muscle, body water, and basal metabolic rate (BMR). This feature is for informational purposes and not intended for medical diagnosis or treatment.

# Keep your body in balance

The Samsung BIA is a body analyzer that uses bioelectrical impedance analysis (BIA) technology to track body composition based on weight, body fat, body mass index (BMI), skeletal muscle, body water, and basal metabolic rate (BMR) measurements. It is not intended to specifically diagnose or treat a medical condition. Requires smartphone with Android 8.0 or later, 1.5GB or more RAM and Samsung Health app (free) version 6.22 or later.

*Body composition analysis results displayed on the watch.*

## Connectivity

Your Galaxy Watch 6 Classic seamlessly syncs with other Galaxy devices. You can play music, control your smartphone camera, make calls, and send texts directly from your watch. Compatibility for Galaxy wearable apps requires Android 8.0 or later and 1.5GB of RAM.

## Display & Customization

The watch features a large, durable crystal glass display. You can personalize your watch with a wide variety of interchangeable bands, which are easy to swap with a simple click. An assortment of new and enhanced watch faces is also available to match your style.

## MAINTENANCE

- **Cleaning:** Regularly clean your watch and strap with a soft, damp cloth. Avoid harsh chemicals or abrasive materials.
- **Charging:** Use only the provided charging cable and a compatible power adapter. Avoid exposing the charging contacts to

water or sweat.

- **Storage:** Store the watch in a cool, dry place when not in use.
- **Water Resistance:** Refer to the product specifications for water resistance ratings. Avoid exposing the watch to high-pressure water or extreme temperatures.

## TROUBLESHOOTING

If you encounter issues with your Galaxy Watch 6 Classic, try the following basic troubleshooting steps:

- **Watch Not Powering On:** Ensure the watch is fully charged. Connect it to the charger for at least 30 minutes.
- **Pairing Issues:** Ensure Bluetooth is enabled on your smartphone and the watch is in pairing mode. Restart both devices and try again.
- **App Functionality:** Ensure your Samsung Health app is updated to the latest version. Check your smartphone's compatibility requirements.
- **Inaccurate Readings:** Ensure the watch is worn snugly on your wrist. Clean the sensors on the back of the watch.
- **Battery Drain:** Reduce screen brightness, disable unnecessary notifications, and close unused apps.

For more detailed troubleshooting or persistent issues, please refer to the official Samsung support website or contact customer service.
