OPERATING YOUR KEYBOARD

Razer Linear Optical Switches Gen-2

Experience ultra-fast, precise key actuation with the improved Razer Linear Optical Switches Gen-2. These switches feature sound dampeners for a quieter typing experience and offer up to a true 8000Hz polling rate for lower input latency, crucial for competitive gaming.

Doubleshot PBT Keycaps

The keyboard is equipped with durable Doubleshot PBT Keycaps. These keycaps are harder and more resilient than standard ABS keycaps, preventing wear-down to a shiny finish and ensuring legends never fade due to their doubleshot molding process.

RGB Lighting (Razer Chroma RGB)

Personalize your gaming experience with Razer Chroma RGB lighting. Through the Razer Synapse software, you can customize individual key backlighting with 16.8 million colors and various dynamic effects, or synchronize lighting across other Razer Chroma-enabled devices.

Hybrid On-board Memory and Cloud Storage

Save up to 5 on-board memory profiles directly to the keyboard, allowing you to access your custom settings anywhere without software. For more extensive customization, utilize cloud storage to build a library of macros and settings.

MAINTENANCE

Cleaning the Keyboard

To maintain optimal performance and appearance, regularly clean your keyboard. Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution. Avoid harsh chemicals or abrasive materials.

Keycap Removal

For deeper cleaning or switch replacement, keycaps can be carefully removed using a keycap puller. Gently pull upwards on the keycap until it detaches from the switch stem. Reattach by aligning the keycap with the switch stem and pressing down firmly.

TROUBLESHOOTING

- **Keyboard Not Responding:** Ensure the USB cable is securely connected to both the keyboard and your PC. Try a different USB port.
- **Lighting Issues:** Verify that Razer Synapse software is installed and updated. Check lighting settings within Synapse.
- **Keys Not Registering:** Clean around the affected key to ensure no debris is obstructing the switch. If the issue persists, contact Razer Support.
