Midea Electric Dryer User Manual

MODEL: MLTE37N1BWW

Important Safety Instructions

Read all instructions before using the appliance. To reduce the risk of fire, electric shock, or injury to persons when using your appliance, follow basic precautions, including the following:

- This electric dryer requires a 240V power supply. Ensure proper electrical installation and grounding.
- The dryer must be grounded with a 3 or 4 wire power cord that includes a grounding conductor and a grounding plug. Power cord should be purchased separately.
- Professional installation and additional accessories may be required.
- Do not dry articles that have been previously cleaned in, washed in, soaked in, or spotted with gasoline, dry-cleaning solvents, or other flammable or explosive substances, as they emit vapors that could ignite or explode.
- Do not allow children to play on or in the appliance. Close supervision of children is necessary when the appliance is used near children.
- Before the appliance is removed from service or discarded, remove the door to the drying compartment.
- Do not reach into the appliance if the drum is moving.
- Do not install or store this appliance where it will be exposed to the weather.
- Do not tamper with controls.
- Clean the lint screen before or after each load.

For detailed safety information, always refer to the complete user manual provided with your appliance.

Wrinkle Care

After the drying cycle is finished, the drum will constantly rotate at a low frequency to prevent wrinkles caused by piling, and cold air will be blown into the drum to keep clothes fresh.
