PIVOT A22A

PIVOT A22A Atlas Tablet Case User Manual

For iPad (10th Generation)

INTRODUCTION

This manual provides instructions for the proper setup, operation, and maintenance of your PIVOT A22A Atlas Tablet Case. This case is specifically designed to provide robust protection and enhanced functionality for the iPad (10th generation).

SETUP INSTRUCTIONS

1. Installing Your iPad into the Case

1. Ensure your iPad (10th generation) is clean and free of debris.
2. Carefully align the iPad with the case, ensuring all ports and buttons match the case cutouts.
3. Gently press the iPad into the case until it is securely seated. Verify that all edges are fully enclosed by the case's protective frame.

2. Attaching the Folio Cover

1. Align the folio cover with the designated attachment points on the side of the case.
2. Securely snap or slide the folio cover into place. Ensure it is firmly attached to provide screen protection.

Upgraded PIVOT Folio Cover:

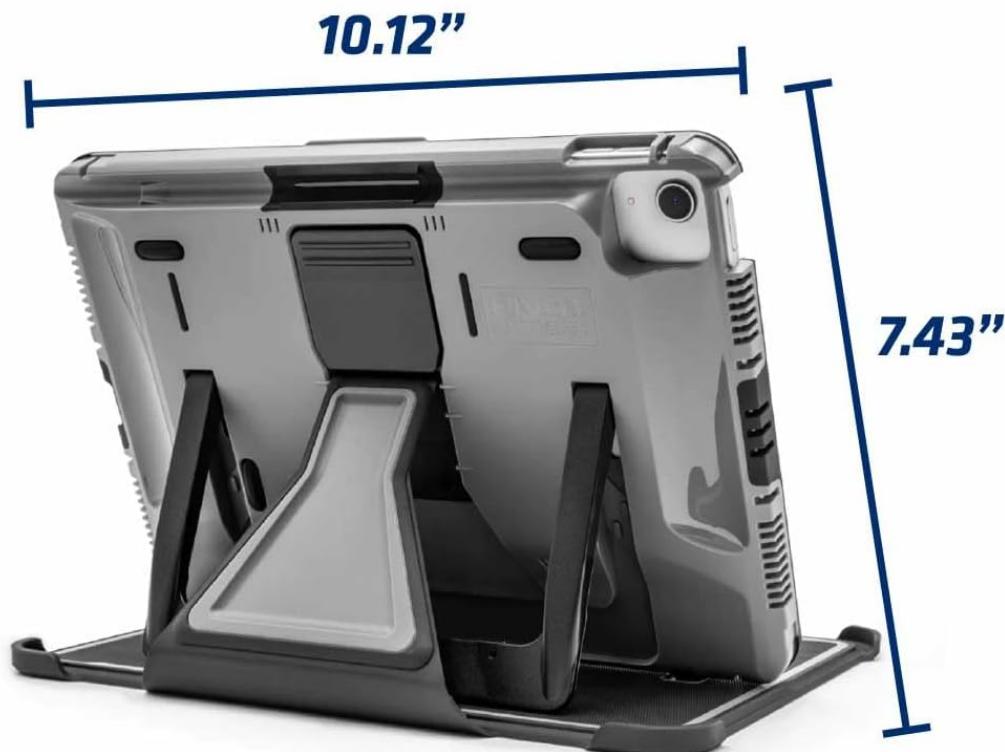

Provides superior screen protection, increased impact resistance, and quick-viewing support in landscape orientation with a selection of viewing positions.

3. Using the Integrated Kickstand

1. Locate the kickstand on the back of the case.
2. Gently pull the kickstand outwards until it locks into your desired viewing angle. The kickstand offers 120-degrees of adjustability for both landscape and portrait orientations.
3. To retract, press the release mechanism (if present) or gently push the kickstand back into its flush position until it clicks.

2nd Generation PIVOT Kickstand:

Reinforced with internal ribs for strength and durability, the new PIVOT Kickstand features 120-degrees of adjustability for both landscape and portrait orientation.

4. Connecting to a PIVOT Mount

The PIVOT A22A case features a standardized mounting channel for secure attachment to PIVOT mounting solutions (sold separately). This includes PanaVise mounts and Supergrip Suction Cups.

1. Ensure your PIVOT mount is securely installed according to its own instructions.
2. Align the PIVOT case's mounting plate with the mount's connection point.
3. Slide the case onto the mount until it locks securely in place. Verify the connection is firm before use.

Compatibility:

- iPad Pro (10th gen.)

OPERATING INSTRUCTIONS

1. Adjusting Viewing Angles

The integrated kickstand allows for multiple viewing angles. Extend the kickstand and adjust its position to achieve the desired landscape or portrait orientation. The 120-degree adjustability provides flexibility for various tasks.

Image: The PIVOT A22A Atlas Tablet Case holding an iPad, with the folio cover folded to create a stable viewing stand.

2. Utilizing the Folio Cover

The folio cover protects the iPad screen when closed. When open, it can be folded back to serve as an additional stand for various viewing positions, enhancing versatility.

3. Accessing Ports and Buttons

The case is designed with precise cutouts to ensure full access to all iPad ports, buttons, and the camera without needing to remove the device from the case.

4. Accessory Integration

The PIVOT A22A case is compatible with the Apple Magic Keyboard Folio and features a dedicated slot for the 1st generation Apple Pencil. An integrated socket is also provided for an Apple AirTag, allowing for device tracking. *Note: All Apple accessories are sold separately.*

Integration with iPad Accessories

Compatible with the Apple Magic Keyboard Folio and 1st gen Apple Pencil, with socket for the Apple AirTag.

**All Apple accessories sold separately*

MAINTENANCE

Cleaning the Case

To clean your PIVOT A22A Atlas Tablet Case, use a soft, damp cloth. For stubborn dirt, a mild soap solution can be applied. Avoid harsh chemicals or abrasive materials, as these may damage the polycarbonate and rubber construction.

Inspection for Wear

Periodically inspect the case for any signs of wear or damage, especially around the edges, corners, and the kickstand mechanism. If significant damage is observed, consider replacing the case to ensure continued protection for your iPad.

TROUBLESHOOTING

iPad Not Fitting Correctly

Ensure you have the correct model of iPad (10th generation). Verify that no foreign objects are obstructing the case or iPad. Re-align the iPad and apply gentle, even pressure to seat it properly.

Kickstand Stability Issues

Ensure the kickstand is fully extended and locked into position. Check for any obstructions or damage to the kickstand mechanism. The case should be placed on a flat, stable surface for optimal support.

Mounting Connection Problems

If the case does not securely attach to a PIVOT mount, inspect both the case's mounting plate and the mount's connection point for debris or damage. Ensure the locking mechanism on the mount is fully engaged. For suction cup mounts, ensure the surface is clean, smooth, and non-porous.

Minimal Contact Design

Only a small fraction of the case directly contacts the device, minimizing heat transfer and allowing air circulation through vents in the case back.
