Setup and Programming

Charging the Remote

Before initial use, or when the battery indicator is low, charge your RCA Universal Remote Control using the provided USB-C cable. Connect the cable to the remote's USB-C port and plug the other end into a standard USB power adapter (not included) or a powered USB port. A full charge typically provides 8-10 months of average use.

Programming Your Devices

The remote supports multiple programming methods to connect with your devices. The most common method involves using direct codes or an automatic search.

1. **Turn on the device** you wish to control (e.g., TV, DVD player, streaming box).
2. **Find the product code** for your device's brand from the code list. If a physical list is not available, visit RCAcodeSupport.com for an updated list.
3. **Press and hold the device key** on the remote (e.g., TV, DVD, STREAM) that you want to program for approximately 2 seconds. The power key will illuminate and stay on. Release the key.

4. **Enter the first five-digit code** for your brand. The power key will flash after each digit is entered. If the code is correct, the power key will turn off.
5. **Test the remote** by pressing the Power button. If the device turns off, try other functions like volume or channel. If it works, the programming is complete. If not, repeat the steps with the next code for your brand.

For automatic code search, consult the full manual available atRCAcodeSupport.com.

Operating Instructions

Once programmed, your RCA Universal Remote Control functions like your original device remotes. Select the desired device mode (TV, SAT/CBL/DVD, STREAM) using the dedicated buttons at the top of the remote, then use the corresponding control buttons.

Quick Access Streaming Keys

The remote features dedicated quick access buttons for popular streaming services. Simply press the Netflix, Disney+, Hulu, or YouTube button to launch the respective application on your programmed streaming device.

Troubleshooting

If your remote is not functioning as expected, consider the following common issues:

- **Remote Not Responding:** Ensure the remote is fully charged. Connect it to a USB-C power source and allow it to charge for a few hours.
- **Device Not Responding to Remote:** Verify that the remote is programmed correctly for the specific device. Re-attempt the programming steps, trying alternative codes if available for your brand. Ensure you are in the correct device mode (TV, DVD, STREAM).
- **Limited Functionality:** Some advanced functions of original remotes may not be supported by universal remotes. Ensure the remote is pointed directly at the device's IR receiver.
- **Backlight Not Working:** Check if the remote needs charging.
