Autopixl Universal Windshield Wiper Blades User Manual

Model: BEFINHIIF-A58E02774E7F09D73A0917D9D93

1. PRODUCT OVERVIEW

The Autopixl Universal Windshield Wiper Blades are designed to provide clear and streak-free visibility in all weather conditions. These frameless, bracketless wiper blades feature a U-type universal hook for broad compatibility with most car models. Constructed with high-grade natural rubber and high carbon memory steel, they offer durability and optimal performance.

Key Features:

- **Streak-Free Wiping:** Specially blended rubber ensures smooth, clean, and chatter-free wiping for ultimate visibility.
- **Universal Fit:** Designed for J-hook wiper arms, requiring no additional adapters for quick installation.
- **Durable Materials:** Made with AAA grade natural rubber strips, high carbon memory steel, and a one-piece deflector for maximum performance and longevity.
- **All-Weather Performance:** Engineered with 1,000 pressure points to fit your windshield perfectly, reducing drag, noise, and wind lift in rain, snow, or dust.

These wiper blades meet or exceed OEM safety and durability standards, ensuring a reliable and safe driving experience.

2. INSTALLATION GUIDE

Installing your Autopixl Universal Windshield Wiper Blades is a straightforward process. Please follow these steps carefully to ensure proper fitment and performance.

2.1 Compatibility Check

These wiper blades are designed for vehicles with a Universal U-type hook wiper arm. Please verify your vehicle's wiper arm type before proceeding with installation.

2.2 Installation Steps

Follow these 4 easy steps for a secure installation:

1. **Step 1: Prepare the Wiper Arm.** Lift the existing wiper arm away from the windshield until it locks into the upright position. If replacing old blades, remove them according to your vehicle's manual.
2. **Step 2: Remove Protective Cover.** Locate the green plastic protector on the rubber blade of your new AutopiXL wiper. Carefully remove this protective strip before installation.
3. **Step 3: Attach the Blade.** Align the J-hook of your vehicle's wiper arm with the connector on the new wiper blade. Push the blade firmly onto the hook until you hear a click, indicating it is securely locked in place.
4. **Step 4: Secure and Test.** Gently pull on the wiper blade to ensure it is firmly attached. Carefully lower the wiper arm back onto the windshield. Repeat for the other wiper blade. Test the wipers with water to confirm proper operation and streak-free performance.

Installation : 4 Easy Steps

Remove the green plastic protector

3. OPERATING INSTRUCTIONS

Once installed, your Autopixl Windshield Wiper Blades are ready for use. They are designed to provide optimal performance in various driving conditions.

Activate your vehicle's windshield wiper system as needed. The aerodynamic design of these blades significantly reduces drag, noise, and wind lift, ensuring a quiet and effective wipe.

Clear vision, safe driving

Image 3.1: Clear vision provided by Autopixl wiper blades during rainy conditions.

The 1,000 pressure points ensure the blade conforms perfectly to your windshield's curvature, delivering consistent contact and a streak-free wipe across the entire glass surface.

4. MAINTENANCE

Proper maintenance can extend the lifespan and maintain the performance of your Autopixl Windshield Wiper Blades.

- **Regular Cleaning:** Periodically clean the rubber blade with a soft cloth and windshield washer fluid or mild soapy water. This removes dirt, grime, and road film that can cause streaking or chattering.
- **Inspect for Damage:** Regularly check the rubber blade for cracks, tears, or hardening. Damaged blades should be replaced promptly to ensure clear visibility.
- **Avoid Dry Wiping:** Do not operate wipers on a dry windshield as this can damage the rubber blade and scratch the glass. Always use with sufficient water or windshield washer fluid.
- **Clear Debris:** Before using wipers, remove any large debris like leaves, ice, or heavy snow from the windshield to prevent damage to the blades.

5. TROUBLESHOOTING

If you experience issues with your Autopixl Windshield Wiper Blades, consider the following common problems and solutions:

Problem	Possible Cause	Solution
Streaking	Dirt or debris on the blade; worn or damaged rubber; windshield contamination.	Clean the blade with a damp cloth. Inspect the blade for damage and replace if necessary. Clean the windshield thoroughly.
Chattering/Skipping	Blade not making full contact; bent wiper arm; dry windshield.	Ensure blade is properly installed. Check wiper arm for bends. Always use with sufficient water or washer fluid.
Noise (Squeaking/Screeching)	Dry windshield; dirty blade; incorrect blade angle.	Use washer fluid. Clean the blade. Ensure proper installation and contact with the windshield.
Unwiped Areas	Blade not conforming to windshield; worn blade.	Check for proper installation. Replace the blade if it appears worn or stiff.

6. SPECIFICATIONS

The following are the general specifications for Autopixl Universal Windshield Wiper Blades:

Attribute	Detail
Brand	Autopixl
Model Number	BEFINHIIF-A58E02774E7F09D73A0917D9D93
Vehicle Service Type	Car
