6. TROUBLESHOOTING

If you encounter any issues with your nightstand, refer to the following common problems and solutions:

Drawer Misalignment or Sticking:

If your drawers are not aligning correctly or are sticking, it is often due to incorrect installation of the drawer slides.

- **Check Slide Rail Holes:** Ensure that the slide rail holes on the drawer side panels are installed correctly. The roller part of the rail should be fixed on the side panel.
- **Adjust Screw Position:** Adjust the screw position to the hole pointed by the red arrow in the assembly diagram, not the orange arrow. This ensures proper alignment and smooth operation.

For a visual guide on correcting drawer alignment, please watch the video below:
