6. MAINTENANCE

- Keep the scanner's scanning window clean using a soft, lint-free cloth. Avoid abrasive materials.
- Store the scanner in a cool, dry place when not in use.
- Ensure the battery is charged regularly to maintain optimal performance.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Scanner not connecting wirelessly.	Receiver not properly inserted or not recognized.	Ensure the Nano Receiver is fully inserted into a working USB port. Try a different USB port.
Scanner not reading barcodes.	Barcode damaged, poor lighting, or incorrect scanning angle.	Ensure the barcode is clear and well-lit. Adjust scanning angle and distance. Check if the barcode type is supported.
No data transmitted to computer.	Not paired, or application not ready for input.	Confirm successful pairing. Ensure the cursor is in a text field in your application (e.g., Word, Excel).
Short battery life.	Battery not fully charged or aging battery.	Charge the scanner fully using the provided USB cable. If issues persist, consider battery replacement if applicable.
