

OhO sunshine 628 4K

OhO Camera Glasses User Manual

Model: 628 4K

INTRODUCTION

Thank you for choosing OhO Camera Glasses. These 4K Pro 24M Resolution H.265 Smart Glasses are designed for outdoor sports and daily use, featuring a built-in 256GB memory and UV400 polarized lenses. This manual provides detailed instructions to help you get the most out of your device.

SETUP

Charging the Device

Before first use, fully charge your OhO Camera Glasses. Connect the included USB cable to the charging port on the glasses and to a power source. The battery has a working life of approximately 30 minutes on a single charge. The camera can operate while being recharged using a power bank.

Memory and Data Transfer

The glasses come with a built-in 256GB memory, capable of storing approximately 14.5 hours of camera data. To access your recorded content, connect the glasses to a computer or TV using the included USB cable. Please note that the memory is built-in and cannot be replaced due to the water-resistant design.

OPERATING INSTRUCTIONS

One-Button Touch Operation

The OhO Camera Glasses feature a simple one-button touch operation for ease of use. A single touch allows you to turn the device on, turn it off, or take a picture. When the camera starts, takes pictures, or stops, the sunglasses provide a vibration alert and an LED light indicator for feedback.

MAINTENANCE

Lens Care

The lenses are 100% UV400 protected and polarized, featuring a Drop-bell lens for various outdoor sports and US Safety Lens Standard ANSI/ISEA Z87.1-2015 impact resistance. To maintain clarity and protection, clean lenses with a soft, lint-free cloth. Avoid abrasive materials or harsh chemicals. While the memory is sealed for water resistance, the glasses are not designed for submersion; avoid prolonged exposure to water.

TR90 Technical Material

New Technology Material to Keep Glasses Light and Flexible to Wear All Day

Frame Care

The TR90 flexible material ensures comfort and durability. Clean the frame with a damp cloth. Store the glasses in their protective case when not in use to prevent scratches and damage.

TROUBLESHOOTING

- Device not charging or recognized by USB:** Ensure the USB cable is securely connected to both the glasses and the power source/computer. Try a different USB port or charging adapter. If the issue persists, contact customer support.
- Poor audio quality in recordings:** While the video quality is high, some users have reported audio feedback. Ensure the microphone area is clear of obstructions. If audio issues persist, consider using external audio recording if high-fidelity audio is critical for your application.

- **Loose lenses:** If a lens becomes loose or falls out, carefully reinsert it. If the lens does not secure properly or continues to fall out, this may indicate a manufacturing defect. Contact customer service for assistance.
- **Short battery life:** The battery life is approximately 30 minutes of continuous recording. For extended use, utilize a power bank as described in the 'Charging' section.

SPECIFICATIONS
