FEELNEEDY YPD-C004

FEELNEEDY Pet Water Fountain Filter Replacement Manual

Models: YPD-C004S, YPD-C004P

Brand: FEELNEEDY

INTRODUCTION

This manual provides essential instructions for the proper use and maintenance of your FEELNEEDY Pet Water Fountain Filter Replacements. These filters are designed to ensure clean and fresh drinking water for your pets, compatible specifically with FEELNEEDY cat water fountain models YPD-C004S and YPD-C004P.

What's in the Box

- 10 x Replacement Filters
- 6 x Replacement Pump Filter Sponges

This image displays the FEELNEEDY replacement filter pack, showing 10 individual filters and 6 pump sponges, along with their packaging.

PRODUCT OVERVIEW

The FEELNEEDY replacement filters feature a multi-layer filtration system to purify water effectively. They are specifically designed for the YPD-C004S and YPD-C004P fountain models.

Compatible with FeelNeedy Pet Water Fountain

FeelNeedy YPD-C004

This image illustrates the various models of FEELNEEDY pet water fountains (YPD-C004S, YPD-C004P) that are compatible with these replacement filters, showcasing them in different colors.

Filtration System

Each filter incorporates a 4-layer system to ensure water quality:

1. **High-Density Cotton:** Filters hair and larger debris.
2. **Ion Exchange Resin:** Softens hard water and reduces heavy metals.
3. **Coconut Shell Activated Carbon:** Removes odors, chlorine, and impurities.
4. **Additional Filter Cotton:** Provides a final stage of particulate filtration.

This diagram details the five stages of the filter's antibiosis system, including primary sponge for hair and detritus, filter cotton for particulate dust, activated carbon for microparticles, ion exchange resin for hard water, and a final filter cotton layer.

SETUP INSTRUCTIONS

Before installing a new filter, proper preparation is crucial for optimal performance.

Filter Preparation

1. **Soak the Filter:** Submerge the new filter in clean water for 3-5 minutes. This helps to remove any loose

carbon particles and ensures proper water flow.

2. **Rinse Thoroughly:** After soaking, rinse the filter under running water for a few seconds to further remove any residual particles.

This image provides a two-step guide on preparing the filter: first, soaking it for 3-5 minutes, and then thoroughly rinsing it under running water to ensure optimal performance.

MAINTENANCE

Regular replacement of filters and sponges is essential for maintaining water quality and the longevity of your pet water fountain.

Filter and Sponge Replacement Frequency

It is recommended to replace the main filter every 2 to 4 weeks, depending on the number of pets using the fountain and the water quality in your area. The pump filter sponge should also be checked and replaced regularly to prevent debris from entering the pump mechanism.

Replacing Filters and Sponges

1. Unplug the fountain and disassemble the top tray and pump unit.
2. Remove the old main filter and pump filter sponge. Dispose of them properly.
3. Clean the fountain components thoroughly with water and a mild, pet-safe detergent. Rinse all parts completely.
4. Insert the new, pre-soaked main filter into its designated slot in the fountain tray.
5. Place a new pump filter sponge around the pump unit.
6. Reassemble the fountain, ensuring all parts are securely in place.
7. Refill the fountain with fresh water and plug it back in.

SPECIFICATIONS

Feature	Detail
Item Weight	0.18 Grams (0.006 ounces)
Manufacturer	FEELNEEDY
Item Model Number	YPD-C004
Item Package Dimensions L x W x H	6.3 x 6.3 x 3.94 inches
Material	High-density cotton, Ion exchange resin, Coconut shell activated carbon
Number of Items	10 (filters) + 6 (sponges)
Specific Uses for Product	Indoor Pet Water Fountain Filtration
