MAINTENANCE AND CARE

Proper care is essential to maintain the softness, quality, and longevity of your BEDSURE Fleece Blanket.

- **Washing:** This blanket is machine washable. Wash at temperatures between 30°C and 60°C (86°F to 140°F). For best results, wash at 40°C (104°F).
- **Drying:** Tumble dry on a low temperature setting. Avoid high heat, as it can damage the fibers and reduce softness. Air drying is also an option.
- **Bleaching:** Do not bleach.
- **Ironing:** Do not iron.
- **Dry Cleaning:** Do not dry clean.
- **Separate Wash:** Wash separately or with similar colors to prevent color transfer.

Following these instructions will help ensure your blanket remains soft and comfortable after washing.

TROUBLESHOOTING

Loss of Softness After Washing

If your blanket feels less soft after washing, consider the following:

- **Water Temperature:** Ensure you are washing at the recommended temperature (30-60°C, ideally 40°C). Excessively hot water can sometimes affect synthetic fibers.
- **Detergent Type:** Use a mild detergent. Avoid harsh chemicals or excessive amounts of detergent, which can leave residue on the fibers.
- **Fabric Softener:** While fabric softener can help, some types might build up over time. Use sparingly or try a white vinegar rinse (1/2 cup in the rinse cycle) occasionally to remove residue.
- **Drying Temperature:** High heat in the dryer is a common cause of fiber damage and reduced softness. Always use a low heat setting or air dry.
- **Overloading Washer/Dryer:** Do not overload your washing machine or dryer. This prevents proper cleaning and drying, leading to stiffness.
