iDealBed S4-4i-SS

iDealBed S4 Nebula Luxury Hybrid Mattress & 4i Custom Adjustable Bed Sleep System User Manual

Model: S4-4i-SS

Brand: iDealBed

Introduction

Welcome to enhanced sleep with your new iDealBed S4 Nebula Luxury Hybrid Mattress and 4i Custom Adjustable Bed Sleep System. This manual provides essential information for the setup, operation, maintenance, and troubleshooting of your sleep system, ensuring you achieve optimal comfort and a restorative night's rest. The iDealBed S4 Nebula system combines advanced mattress technology with a versatile adjustable base, designed to provide personalized comfort, superior cooling, and robust support. Please read this manual thoroughly before using your new sleep system.

Setup Instructions

Your iDealBed S4 Nebula Sleep System requires some assembly. Please follow these steps carefully to ensure proper setup and functionality.

1. **Unpack Components:** Carefully remove all components from their packaging. Ensure all parts listed in the included installation manual are present.
2. **Assemble Adjustable Base:** Follow the specific instructions provided in the separate installation manual for the 4i Custom Adjustable Bed. This typically involves unfolding the frame, attaching the legs, and connecting any necessary cables.
3. **Adjust Leg Height (Optional):** The adjustable base includes multi-height legs (8", 3", and 2" sections). Combine these sections as desired to achieve your preferred bed height. Legs can also be removed for zero-clearance use on a platform bed or flat surface.
4. **Place Mattress:** Once the adjustable base is assembled and positioned, carefully place the S4 Nebula Luxury Hybrid Mattress on top of the base. Ensure it is centered and aligned.
5. **Install Retainer Bar:** Attach the mattress retainer bar at the foot of the bed, if desired. This helps prevent the mattress from shifting during adjustments.
6. **Connect Power:** Plug the adjustable base into a grounded electrical outlet.

Operating Instructions

Your iDealBed 4i Custom Adjustable Bed offers a range of features controlled by the wireless remote. Familiarize yourself with the remote's functions for a personalized sleep experience.

Wireless Remote Control

The backlit wireless remote allows you to effortlessly adjust your bed's position and activate various features.

- **Head/Foot Elevation:** Use the dedicated buttons to raise the head section up to 80° and the foot section up to 50°.
- **Zero Gravity:** Press the 'ZG' button to activate the Zero Gravity preset, which elevates your head and feet to a position that mimics weightlessness, reducing pressure on your back.
- **Memory Presets:** The remote features two customizable memory presets (M1, M2). Adjust the bed to your desired position, then press and hold a memory button to save it.
- **Full Body Massage:** Activate the massage function with 7 intensity levels and 3 modes. Set a timer for 10, 20, or 30 minutes for automatic shut-off.
- **Flat Button:** Press 'FLAT' to return the bed to a completely flat position.
- **Under-Bed Lighting:** Some models feature under-bed lighting, which can be controlled via the remote.
- **Flashlight:** The remote includes a built-in flashlight for convenience.

Maintenance

Proper care and maintenance will extend the life of your iDealBed Sleep System.

- **Mattress Cover:** The ComfortSeal Non-Skid Lower Cover is a removable, machine-washable zip cover. For best results, machine wash cold on a gentle cycle and tumble dry low. Do not bleach. For the main mattress surface, spot clean with a mild detergent and damp cloth as needed. Do not saturate the mattress.
- **Adjustable Base:** Regularly inspect the adjustable base for any loose connections or components. Keep the area around the motors clear of obstructions. Wipe down the frame with a damp cloth as needed.
- **Remote Control:** Keep the remote control clean and dry. Replace batteries as needed (refer to the remote's specific instructions for battery type).
- **General Care:** Avoid jumping on the bed. Do not place heavy or sharp objects on the mattress or base that could cause damage.

Troubleshooting

If you encounter any issues with your iDealBed Sleep System, please refer to the following common solutions before contacting customer support.

Problem	Possible Cause	Solution
Bed does not respond to remote.	No power; Remote batteries low/dead; Remote not paired.	Check power cord connection. Replace remote batteries. Refer to the adjustable base manual for remote pairing instructions.
Motor makes noise but bed does not move.	Obstruction under bed; Weight limit exceeded.	Check for obstructions under the bed. Ensure total weight (users + mattress) does not exceed 1000 lbs.
Massage function not working.	Massage motor unplugged; Remote issue.	Check connections to massage motors. Ensure remote batteries are fresh.
Power outage.	Loss of main power.	The base has an emergency backup battery feature (requires a 9V battery) to return the bed to a flat position during a power outage.
