### 4.1 Pre-Installation Steps

1. Turn off the water supply to the sink at the shut-off valves.
2. Remove your old faucet and clean the sink area thoroughly.

3. Ensure the sink holes are within the specified dimensions.

## 4.2 Faucet Installation

1. If your sink has three holes, place the 6.3-inch deck plate over the holes to cover the two side holes.
2. Insert the faucet body through the center hole (and deck plate if used).
3. From underneath the sink, secure the faucet using the provided mounting hardware (washer and nut). Hand-tighten first, then use a wrench to snug it up, ensuring the faucet is aligned correctly.
4. Connect the hot and cold water supply lines to the corresponding inlets on the faucet and to your water supply valves. The hoses are 24 inches long and have 3/8" connectors.
