7. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Bed frame is wobbly or noisy.	Loose bolts or uneven assembly.	Ensure all bolts are securely tightened. Check that the support legs are evenly placed and adjusted. The unique lock design and EVA sponge should minimize noise.
LED lights are not working.	Power connection issue, remote control battery, or faulty light strip.	Check if the power adapter is securely plugged in. Ensure the remote control has a working battery (if applicable). Verify all light strip connections. If the issue persists, contact customer support.
Charging ports are not functioning.	Power connection issue or faulty port.	Ensure the bed frame is properly powered. Try a different device or cable to rule out device-specific issues. If ports remain non-functional, contact customer support.
Storage drawers do not slide smoothly or open/close properly.	Obstruction in the tracks, damaged wheels, or misaligned drawer.	Check for any items blocking the drawer's path. Inspect the wheels for damage and ensure the drawer is correctly aligned within its compartment. The closing buckle should engage to keep it shut.
