OPERATING INSTRUCTIONS

1. Power On/Off

Refer to the physical instruction manual for specific button locations and sequences to power the camera on or off. Typically, a long press of the power button initiates this action.

2. Recording Video

Once powered on and a memory card is inserted, the camera will begin recording. The 1080p HD video is stored on the memory card. The loop recording feature ensures continuous operation by overwriting the oldest files when the card is full.

Home Security Camera

3. Night Vision Mode

The camera features a night vision function. This mode can be set to manual or timed open, providing clear video capture even in low-light or dark environments. Consult the app or physical manual for activation details.

4. Motion Detection

Activate motion detection through the mobile application. When enabled, the camera will automatically begin recording when movement is detected within its field of view, conserving battery and storage space.

5. Remote Viewing via App

After connecting the camera to the mobile app, you can view live footage, access recorded videos, and adjust settings from your smartphone. Ensure a stable Wi-Fi connection for optimal performance.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and body. Avoid using liquid cleaners or abrasive materials.
 - **Battery Care:** To prolong battery life, avoid fully discharging the camera frequently. Charge the camera regularly, especially if it will be stored for an extended period.
 - **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
 - **Firmware Updates:** Check the mobile application periodically for any available firmware updates to ensure optimal performance and access to new features.
-

TROUBLESHOOTING

Issue: Camera cannot be viewed remotely (only works at home).

Possible Cause: Network configuration issues, firewall restrictions, or incorrect app settings for remote access.

Solution:

- Ensure your home Wi-Fi network has internet access.
- Check the mobile app settings to confirm remote viewing is enabled and configured correctly.
- Verify that your router's firewall is not blocking the camera's connection to the internet for remote access. You may need to consult your router's manual or ISP for port forwarding or UPnP settings.
- Restart both the camera and your router.

Issue: Difficulty with initial setup.

Possible Cause: Incorrect Wi-Fi password, camera not in pairing mode, or app compatibility issues.

Solution:

- Double-check the Wi-Fi network name (SSID) and password. Ensure you are connecting to a 2.4GHz Wi-Fi network, as 5GHz networks are often not supported by security cameras.
 - Reset the camera to factory settings (refer to the physical manual for the reset button location and procedure).
 - Ensure your smartphone's operating system is up to date and the camera app is the latest version.
 - Try the setup process again, closely following the steps in the physical instruction manual and the app.
