Kekoy 36 Inch of 1 Pack

Kekoy 36-inch Grabber Reacher Tool Instruction Manual

Model: 36 Inch of 1 Pack

1. INTRODUCTION

The Kekoy 36-inch Grabber Reacher Tool is designed to extend your reach, making it easier to pick up items from high shelves, the floor, or hard-to-reach areas. Its foldable design and robust construction make it a versatile aid for daily tasks, especially beneficial for seniors, individuals recovering from surgery, or those with limited mobility.

Caring Solutions for Easier Living

2. SETUP AND ASSEMBLY

The Kekoy Grabber Reacher Tool features a foldable design for compact storage. To set up the tool for use:

- 1. Unfold the Tool:** Release the Velcro strap securing the folded sections of the grabber. Gently extend the tool until it is fully straightened.
- 2. Lock the Joints:** Locate the two locking clips along the shaft. Push each clip down firmly until it clicks into place, securing the shaft in its extended position. Ensure both clips are fully engaged for stability.
- 3. Adjust Jaw Orientation (Optional):** The jaw head can rotate 360 degrees. To adjust, pull the jaw head slightly away from the shaft, rotate it to the desired angle (e.g., horizontal or vertical), and then push it back to lock it in place.

3. OPERATING INSTRUCTIONS

To effectively use your Kekoy Grabber Reacher Tool:

- 1. Grip the Handle:** Hold the ergonomic handle firmly. The trigger is designed for comfortable use, even for smaller hands.
- 2. Activate the Jaw:** Squeeze the trigger to close the grabber's jaw. Release the trigger to open the jaw.
- 3. Pick Up Items:** Position the open jaw around the desired item. Squeeze the trigger to securely grasp the item. The anti-slip rubber lining on the jaw ensures a firm hold on various surfaces and shapes.
- 4. Use the Magnet:** For small metallic objects like keys or coins, utilize the integrated magnet located at the tip of the jaw. Simply touch the magnet to the metallic item to pick it up.

4. FEATURES

- **Foldable and Compact:** Ingenious folding mechanism reduces length to less than 12 inches for easy storage and portability. Made of lightweight yet strong aluminum alloy (only 10 ounces).
- **Precise Grip for Scraps:** Coated with deeper and rougher non-slip rubber layer, the "horseshoe" claw jaw increases contact area and friction, enabling precise pickup of tiny items like paperclips and coins.
- **360-Degree Rotating Jaw:** The swiveled head allows for flexible usage, changing the direction of claw opening for upper, vertical, and horizontal tasks without twisting your wrist.
- **Magnetic Claws:** Equipped with magnets for effortlessly picking up small metallic objects.
- **Durable Construction:** Features a lightweight rust-proof aluminum shaft and sturdy steel cable internals for enhanced durability and security when gripping items.
- **Multi-size Options:** This model is 36 inches, ideal for individuals between 5'5" to 5'9" for comfortable reach. Other lengths are available for different height ranges.

5. MAINTENANCE

To ensure the longevity and optimal performance of your grabber tool:

- **Cleaning:** Wipe down the shaft and jaw with a damp cloth as needed. Avoid harsh chemicals that may damage the rubber or aluminum.
- **Storage:** When not in use, fold the tool and secure it with the Velcro strap. Store in a dry place away from extreme temperatures.
- **Inspection:** Periodically check the locking clips and the steel cable for any signs of wear or damage.

6. TROUBLESHOOTING

- **Weak Grip:** Ensure the item is fully within the jaw's grasp. The anti-slip rubber works best when making full contact. For very smooth or heavy items, try adjusting the jaw angle.
- **Difficulty Extending/Folding:** Check that the locking clips are fully disengaged when folding, and fully engaged when extending. Do not force the mechanism.
- **Jaw Not Closing Properly:** Inspect the steel cable internals for any obstructions or damage. If the cable appears frayed or broken, discontinue use and contact customer support.

7. SPECIFICATIONS

Feature	Detail
Product Dimensions	12.8 x 7.09 x 1.5 inches (folded)
Weight	9.14 ounces
Material	Aluminum and Plastic
Jaw Rotation	360 degrees
Claw Width	4 inches (extended)
