5. MAINTENANCE

5.1 Cleaning

To clean the keyboard, gently wipe the keys and trackpad with a soft, damp, lint-free cloth. Avoid using harsh chemicals or abrasive materials that could damage the surface.

5.2 Battery Care

To prolong battery life:

- Avoid fully discharging the battery frequently.
- Store the keyboard in a cool, dry place when not in use for extended periods.
- Charge the keyboard regularly, even if not used daily.

5.3 Power Management

The keyboard features an auto-sleep function to conserve energy:

- If the keyboard is not used for 10 minutes, it will enter sleep mode.
- To reactivate, press any key.
- The keyboard will automatically switch off when your connected Surface Pro is turned off.

6. TROUBLESHOOTING

6.1 Keyboard Not Connecting via Bluetooth

- Ensure the keyboard is charged and powered on.
- Verify Bluetooth is enabled on your Surface Pro.
- Press "Fn" + "C" on the keyboard to re-enter pairing mode.

- Remove any previous "Bluetooth Keyboard" entries from your Surface Pro's Bluetooth device list and attempt to pair again.
- Ensure the keyboard is within the 33-foot (10-meter) operating range.

6.2 Trackpad Not Responding

- Press "Fn" + "F7" to ensure the trackpad is not locked.
- Restart the keyboard by turning it off and then on again.
- Check your Surface Pro's Windows settings for trackpad configurations.

6.3 Keys Not Responding or Lagging

- Ensure the keyboard is fully charged. Low battery can affect performance.
- Check for any obstructions under the keys.
- Reconnect the Bluetooth connection by turning the keyboard off and on, and re-pairing if necessary.
- Ensure there are no other devices causing Bluetooth interference nearby.
