

Orient RA-AK0701S

Orient RA-AK0701S Bambino Version 8 Automatic Multifunction Men's Watch User Manual

Model: RA-AK0701S

INTRODUCTION

The Orient RA-AK0701S Bambino Version 8 is an automatic multifunction men's watch, designed for reliability and classic style. This timepiece features an Orient 21 Jewels automatic self-winding movement (Cal F6724), ensuring accurate timekeeping powered by your daily activities. It is housed in a durable stainless steel case with a domed mineral glass crystal and includes a multi-dial day-date display along with a small second hand function. The watch is completed with a genuine black leather strap and a screw-down exhibition case back, allowing a view of the intricate mechanical movement.

SETUP

1. Unboxing

Carefully remove the watch from its packaging. Verify that the watch, instruction manual, and warranty card are present.

2. Initial Winding

If the watch has stopped, it may require an initial manual wind. Gently rotate the crown clockwise approximately 30-40 times while it is in the normal (pushed-in) position. This will provide enough power reserve to start the watch.

3. Setting Time and Date

1. Pull the crown out to the **first click position** to adjust the date and day. Rotate the crown to set the desired date and day.
2. Pull the crown out to the **second click position** to adjust the time. Rotate the crown to move the hands clockwise until the correct time is displayed. Ensure to account for AM/PM when setting the date change.
3. **Important:** Avoid adjusting the date and day between 9:00 PM and 3:00 AM, as this can damage the movement.
4. Once set, push the crown back into the normal position to start the watch.

OPERATING INSTRUCTIONS

1. Automatic Movement

The Orient RA-AK0701S is an automatic watch, meaning it is powered by the motion of your wrist. As you wear the watch, the rotor inside the movement oscillates, winding the mainspring and storing energy.

2. Power Reserve

When fully wound, the watch typically has a power reserve of approximately 40 hours. If the watch is not worn for an extended period, it will stop. To restart, follow the "Initial Winding" steps in the Setup section.

3. Small Second Hand

The small sub-dial at the 6 o'clock position displays the running seconds.

4. Day and Date Display

The day and date are displayed in separate sub-dials. These advance automatically at midnight.

MAINTENANCE

1. Cleaning

Wipe the watch case and crystal with a soft, dry cloth. For the leather strap, avoid excessive moisture and clean with a specialized leather cleaner if necessary.

2. Water Resistance (3 ATM / 30 Meters)

This watch is resistant to splashes and rain. It is **not suitable** for swimming, showering, or diving. Avoid operating the crown or pushers when the watch is wet.

3. Storage

When not wearing the watch, store it in a cool, dry place, away from direct sunlight and strong magnetic fields.

4. Servicing

For optimal performance and longevity, it is recommended to have your watch serviced by a qualified watchmaker every 3-5 years.

TROUBLESHOOTING

- **Watch Not Running:**

- Ensure the watch has been sufficiently wound, either manually or by wearing it for several hours.
- Check if the crown is fully pushed in.

- **Time Inaccuracy:**

- Automatic watches can be affected by strong magnetic fields. If you suspect magnetization, consult a watchmaker for demagnetization.
- Regular wear is essential for consistent accuracy.
- **Date/Day Not Changing:**
 - Verify that the time is set correctly, especially the AM/PM cycle. The date/day changes around midnight.
 - Ensure you are not attempting to adjust the date/day during the restricted hours (9 PM - 3 AM).

SPECIFICATIONS

Feature	Detail
