TimeFlys Paladin

TimeFlys Paladin Audio Baby Monitor User Manual

Model: 2024

1. Introduction

Thank you for choosing the TimeFlys Paladin Audio Baby Monitor. This manual provides essential information for the safe and effective operation of your device. Please read it thoroughly before use and retain it for future reference.

2. Product Overview

The TimeFlys Paladin Audio Baby Monitor provides a secure, interference-free connection to monitor your baby. It features a long operating range, portable units, and a soothing night light.

Package Contents:

- Parent Unit (Receiver)
- Baby Unit (Transmitter)
- Type C Power Cords (x2)
- User Manual

Unit Components:

Refer to the image below for an overview of the baby and parent unit components.

Image: Overview of the TimeFlys Paladin Baby Monitor units, highlighting the power button, volume controls, night light, and belt clip.

- **Power Button:** To turn the unit on or off.
- **Volume + / - Buttons:** To adjust the sound level on the parent unit.
- **Night Light:** Located on the baby unit, provides a soft glow.
- **Power Light:** Indicates power status and low battery.
- **Belt Clip:** For convenient portability of the parent unit.

3. Setup

3.1 Powering the Units

Both the baby unit and parent unit can be powered by AC power or batteries.

- **AC Power:** Connect the provided Type C power cord to the unit and plug the adapter into a standard electrical outlet.
- **Battery Power:** Each unit has a battery compartment. Insert 3 x AAA alkaline batteries or Ni-MH rechargeable batteries (not included) into each unit. Ensure correct polarity.

The units are designed to be portable and rechargeable when using Ni-MH batteries.

Image: Two TimeFlys Paladin units showing the battery compartment and a close-up of the Type C power cord connection.

3.2 Placement

- **Baby Unit:** Place the baby unit within 1 to 2 meters (3 to 6 feet) of your baby, ensuring it is out of reach.
- **Parent Unit:** Keep the parent unit with you. The monitor offers an extra-long range of up to 2000 feet in open space.

3.3 Channel Selection

The Paladin Baby Audio Monitor offers two channels (A or B). This allows two sets of Paladin monitors to operate simultaneously in different rooms or for families with two children.

- Ensure both the baby unit and parent unit are set to the same channel (A or B) for proper communication.

Image: Two TimeFlys Paladin units, illustrating the option to select Channel A or B for simultaneous operation of multiple sets.

4. Operating Instructions

4.1 Power On/Off

- Press and hold the **Power button** on both the baby unit and parent unit until the power indicator light illuminates.
- To turn off, press and hold the **Power button** again until the indicator light turns off.

4.2 Volume Control

- On the parent unit, press the **Volume +** button to increase the listening volume.
- Press the **Volume -** button to decrease the listening volume.

4.3 Night Light Function

- The baby unit features a soft night light to comfort your baby.
- To activate or deactivate the night light, press the dedicated night light button on the baby unit (refer to

Product Overview image for location).

4.4 Range and Transmission

The monitor provides a secure, interference-free analog transmission with an extra-long range of up to 2000 feet in open spaces. Signal strength may vary depending on environmental factors such as walls and other obstructions.

Image: Diagram illustrating the extra-long range capability of the TimeFlys Paladin Baby Monitor, showing signal transmission over a distance of up to 2000 feet.

4.5 Belt Clip Usage

The parent unit is equipped with a belt clip for convenient hands-free monitoring. Attach the parent unit to your belt or clothing to carry it with you as you move around your home or outdoor areas.

5. Maintenance

5.1 Battery Care

- If using rechargeable Ni-MH batteries, ensure they are fully charged before initial use and recharge regularly.
- Remove batteries from the units if they will not be used for an extended period to prevent leakage.
- Dispose of used batteries responsibly according to local regulations.

5.2 Cleaning

- Wipe the units with a soft, dry cloth.
- Do not use abrasive cleaners or solvents.
- Do not immerse the units in water.

6. Troubleshooting

Problem	Possible Cause	Solution
No sound or weak sound from parent unit	• Parent unit volume is too low. • Units are out of range. • Low battery on either unit. • Units not powered on. • Incorrect channel selection.	• Increase volume on parent unit. • Move units closer together. • Charge or replace batteries. • Ensure both units are powered on. • Verify both units are on the same channel (A or B).
Static or interference	• Other electronic devices nearby. • Units are at the edge of their range.	• Move the monitor units away from other electronic devices (e.g., Wi-Fi routers, cordless phones). • Move units closer together. • Try switching to the other available channel (A or B).
Power light flashing red	Low battery indication.	Charge or replace the batteries in the affected unit.
Units not connecting	• Units are too far apart. • Different channels selected. • Units not powered on.	• Move units closer. • Ensure both units are on the same channel. • Verify both units are powered on.
