

Ordilend GW018

Ordilend Multi-Tool Cleaning Kit Instruction Manual

Model: GW018

INTRODUCTION

The Ordilend Multi-Tool Cleaning Kit is designed for the thorough cleaning and maintenance of various electronic devices, including iPhones, iPads, AirPods, and other mobile phones. This kit provides a comprehensive set of tools to address common issues such as debris accumulation in charging ports, dirty earbuds, and clogged speakers, helping to restore optimal device performance and extend their lifespan. The kit includes 8 specialized cleaning brushes, a soft plastic lens cleaning pen, detergent, a large microfiber cloth, and cleaning putty, all housed in a compact and portable storage case.

SETUP

Upon opening the Ordilend Multi-Tool Cleaning Kit, you will find a variety of specialized tools. Familiarize yourself with each component before use. The kit is designed for easy assembly and disassembly of its modular tools. Each tool can be attached to the main handle for extended reach and comfortable grip during cleaning.

12-IN-ONE PHONE CLEANING KIT

OPERATING INSTRUCTIONS

Cleaning Charging Ports (iPhone, iPad, and Type-C)

1. **Initial Debris Removal:** Use the designated port pick tool to carefully remove larger dust, lint, and debris from inside the charging port. Ensure gentle movements to avoid damaging the internal pins.
2. **Stain and Rust Cleaning:** For stubborn stains or minor rust, utilize the steel brush. Gently brush the affected areas within the port.
3. **Fine Dust and Residue Cleaning:** Apply a small amount of the provided detergent to the appropriate port wipe (iPhone or Type-C). Carefully insert the moistened wipe into the port to clean fine dust and residues.

Image: This image shows the various cleaning tools, including the steel brush, metal pen tip, and port pick, in action to remove lint, stains, hair, dust, fuzz, rust, and oxidization from an iPhone's charging port.

Image: A visual comparison demonstrating the effectiveness of the cleaning kit. The 'Before' image shows a charging port filled with debris, while the 'After' image displays a clean, clear port.

Video: This video demonstrates the practical application of the Ordilend cleaning kit for USB ports and cables, highlighting its effectiveness in removing debris and restoring connectivity.

Video: Watch this video to see how the Ordilend cleaning kit can resolve charging issues for iPads and iPhones by effectively cleaning the charging ports.

Video: This video provides a detailed demonstration of using the Ordilend cleaning kit specifically for iPhone charging ports, ensuring a thorough clean.

Repairing Lightning Cables

To address issues with Lightning cables, such as intermittent charging or oxidation damage on connectors:

1. **Cable Connector Cleaning:** Use the cable wipe tool. Apply a small amount of the provided detergent to the cable wipe.
2. **Thorough Cleaning:** Gently wipe the metal contacts of the Lightning cable connector with the moistened cable wipe. This helps to remove dirt, grime, and oxidation that can hinder proper connection.

Note: This cleaning kit is not designed for cleaning USB Type-C cables.

Image: This image illustrates the cleaning kit's ability to restore Lightning cable connectors. The 'Before' image shows a tarnished connector, and the 'After' image shows a clean, functional connector.

USE TOOL DETERGENT & PORT WIPE TOGETHER WITH OUR SOLUTION

Repair Arcing/Oxide Damaged
(Blackened) Pins

Image: A step-by-step guide on applying the cleaning detergent. It shows dripping the solution onto the port wipe and then using it to clean the charging connector, addressing issues like arcing or oxide-damaged pins.

Cleaning Speakers & Earbuds

Maintain the audio quality of your devices by regularly cleaning speakers and earbuds:

1. **Earbud Charging Case:** Use the high-density brush to clean dirt and debris from inside the earphone charging case.
2. **Earbud Sound Outlets:** For the sound outlet holes of earbuds, use the metal pen tip to gently dislodge any accumulated dirt. Follow up with the high-density brush to sweep away loosened debris.
3. **General Earbud Surface:** The cleaning putty can be used to pick up dust and grime from the general surface and tiny gaps of the earbuds without causing damage.

SAFE FOR THE EARBUDS COMPONENTS AND HOLES

Image: This series of images demonstrates how to safely clean AirPods. It shows the use of a brush for the charging case, a metal pen tip for the earbud's sound outlet, and cleaning putty for general earbud surface cleaning.

Video: This video reviews the multifunctionality of the Ordilend cleaning kit, demonstrating its use for different electronic devices and components.

Video: An in-depth review of the Ordilend cleaning kit, focusing on its effectiveness for both phones and AirPods.

Video: This video highlights the AirPods cleaning capabilities of the Ordilend kit and showcases its convenient storage case.

MAINTENANCE

To ensure the longevity and effectiveness of your Ordilend cleaning kit:

- **Clean Tools After Use:** After each cleaning session, wipe down the tools to remove any accumulated dirt or detergent residue.
- **Proper Storage:** Always store all components back in the provided compact storage case. This protects the tools from damage and keeps them organized.
- **Detergent Storage:** Ensure the detergent bottle is tightly sealed and stored in a cool, dry place.
- **Microfiber Cloth Care:** The microfiber cloth can be gently hand-washed with mild soap and air-dried for reuse.

TROUBLESHOOTING

Issue: Intermittent or Slow Charging

Solution: This is often caused by lint, dust, or debris in the charging port. Use the port pick, steel brush, and detergent with the appropriate port wipe as described in the 'Cleaning Charging Ports' section. Ensure all debris is thoroughly removed.

Issue: Cable Not Connecting Properly / Oxidation on Connector

Solution: Oxidation or dirt on the cable connector can prevent a stable connection. Follow the steps in the 'Repairing Lightning Cables' section to clean the cable contacts using the cable wipe and detergent.

Issue: Reduced Audio Quality from Earbuds/Speakers

Solution: Dirt and earwax can accumulate in earbud sound outlets and speaker grilles. Use the metal pen tip and high-density brush as detailed in the 'Cleaning Speakers & Earbuds' section to clear these areas.

Important Note:

This cleaning kit is specifically designed for Lightning ports (iPhone, iPad) and Type-C ports (some iPads, other devices). It is **not** intended for cleaning USB Type-C cables themselves, only the device's Type-C port.

SPECIFICATIONS

Model Number	GW018
Brand	Ordilend
Item Weight	4.2 ounces
Package Dimensions	3.5 x 2.44 x 1.85 inches
Color	Black
Included Components	8 x tool cleaning brushes, 1 x Soft plastic lens cleaning pen, 1 x Detergent, 1 x large microfiber cloth, 4 x cleaning putty, 1 x user manual
