## TROUBLESHOOTING

---

### Frame Not Turning On

- Ensure the DC charger is securely connected to both the frame and a working power outlet.
- Verify the power outlet is functional by plugging in another device.

### Cannot Connect to Wi-Fi

- Check if your Wi-Fi network is active and within range.
- Re-enter your Wi-Fi password carefully, ensuring correct capitalization.
- Restart your Wi-Fi router and the digital picture frame.
- The frame only supports 2.4GHz network band. Ensure your router is configured for this band or that you are connecting to a 2.4GHz SSID.

### Photos Not Appearing on Frame

- Ensure the Frameo app is successfully paired with your frame (check the 'My Friends' section in the frame's settings).
- Verify that photos/videos were successfully sent from the app (check the app's history).
- Check the frame's storage capacity. If full, delete some old photos or insert a Micro SD card.
