Bulova Marine Star Quartz Watch Model 96B419 Instruction Manual

Model: 96B419

INTRODUCTION

This manual provides essential information for the proper use, care, and maintenance of your Bulova Marine Star Quartz Watch, Model 96B419. Please read these instructions carefully to ensure optimal performance and longevity of your timepiece.

PRODUCT OVERVIEW

The Bulova Marine Star Quartz Watch, Model 96B419, is a sophisticated timepiece designed for reliability and style. It features a silver-tone stainless steel case, a blue leather and black silicone strap, and a quartz movement for accurate timekeeping.

Key Features:

- Quartz Movement for precise timekeeping
- Calendar function (Date display)
- Luminous hands and markers for visibility in low light
- Internal 60-minute timing ring, operated by a dedicated crown
- 100 meters (330 feet) water resistance
- Durable silver-tone stainless steel case
- Comfortable blue leather and black silicone strap

Components:

1. **Main Crown:** Used for setting time and date.
2. **Timing Ring Crown:** Used to operate the internal 60-minute timing ring.
3. **Watch Face:** Displays time, date, and timing ring.
4. **Hands:** Hour, Minute, Second hands.
5. **Date Display:** Window showing the current date.
6. **Strap:** Blue leather and black silicone combination strap with buckle closure.

Back view of the Bulova Marine Star Quartz Watch, Model 96B419, showing the case back and the blue leather and black silicone strap.

SETUP

Setting the Time:

1. Pull the main crown (typically at the 3 o'clock position) out to the second click position. The second hand will stop.
2. Turn the crown to move the hands clockwise until the desired time is set. Ensure AM/PM is correctly observed if setting the date.
3. Push the crown back in to the normal position. The second hand will resume movement.

Setting the Date:

1. Pull the main crown out to the first click position.
2. Turn the crown counter-clockwise (or clockwise, depending on the movement) until the correct date appears in the date window.
3. Push the crown back in to the normal position.

Note: Avoid setting the date between 9:00 PM and 3:00 AM, as this can interfere with the automatic date change mechanism.

Strap Adjustment:

The watch features a buckle closure. Adjust the strap by selecting the appropriate hole for a comfortable and secure fit on your wrist. The combination of leather and silicone provides both durability and comfort.

OPERATING INSTRUCTIONS

Timekeeping:

Your Bulova Marine Star watch is equipped with a reliable quartz movement, providing accurate timekeeping with minimal maintenance.

Using the Internal Timing Ring:

The internal 60-minute timing ring is operated by the crown located at the 10 o'clock position. To use it:

1. Rotate the crown at the 10 o'clock position to align the desired starting point on the internal timing ring with the minute hand or a specific marker.
2. The timing ring can be used to measure elapsed time up to 60 minutes.

Water Resistance (100M / 330 Feet):

This watch is water resistant to 100 meters (330 feet). This rating makes it suitable for:

- Daily use and accidental splashes

- Swimming
- Snorkeling

Important: It is **not** suitable for scuba diving or high-impact water sports. Always ensure both crowns are fully pushed in before exposing the watch to water. Do not operate the crowns while the watch is wet or submerged.

MAINTENANCE

Cleaning:

Regularly clean your watch with a soft, dry cloth. For water-resistant models, a slightly damp cloth can be used, followed by drying. Avoid using harsh chemicals or abrasive materials.

Battery Replacement:

As a quartz watch, it is powered by a battery. When the battery runs low, the second hand may start to jump in two-second intervals (End-of-Life indicator). Battery replacement should be performed by an authorized Bulova service center or a qualified watchmaker to ensure proper sealing and maintain water resistance.

Water Resistance Care:

- Always ensure the crowns are fully pushed in before any contact with water.
- Avoid exposing the watch to extreme temperature changes (e.g., hot showers followed by cold water), as this can compromise seals.
- Have the water resistance seals checked periodically (e.g., every 2-3 years) by a professional, especially if the watch is frequently exposed to water.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch not running	Depleted battery; Crown not pushed in	Replace battery (professional service recommended); Push crown fully in
Date not changing at midnight	Time set incorrectly (AM/PM); Date set during restricted hours	Adjust time to correct AM/PM; Reset date outside of 9 PM - 3 AM window
Condensation under crystal	Water ingress; Extreme temperature change	Seek immediate professional service to prevent damage

SPECIFICATIONS

Feature	Detail
