Key features of the shower shelf, including efficient use of space, elegant aesthetic, durability, versatility, and ease of cleaning.

Specifications

Feature	Detail
Product Dimensions	9"D x 9"W x 0.63"H
Size	9 inches
Material	Engineered Marble
Finish Type	Polished
Color	Super Black
Item Weight	3 Pounds
Installation Type	Wall Mount
Special Feature	Moisture Resistant
Assembly Required	No
Included Components	1 Corner Shelf (Installation kit and hardware not included)

Visual representation of the shelf's dimensions: 9 inches by 9 inches, with a thickness of 5/8 inches.

Setup and Installation

This engineered marble corner shelf is designed for wall-mounted installation. Please note that the**installation kit and hardware are not included** with the product. Professional installation is recommended to ensure proper and secure mounting, especially in wet environments like showers.

Recommended Installation Method (Adhesive-Based)

For a secure and waterproof installation, a high-quality silicone sealant or construction adhesive suitable for wet environments and tile/stone surfaces is typically used. Always refer to the adhesive manufacturer's instructions for specific application and curing times.

1. **Surface Preparation:** Ensure the corner wall surfaces where the shelf will be installed are clean, dry, and free of dust, grease, or soap residue. For tiled surfaces, ensure grout lines are fully cured.
2. **Marking:** Carefully mark the desired height and position for the shelf on the wall. Use a level to ensure the shelf will be perfectly horizontal.
3. **Adhesive Application:** Apply a continuous bead of silicone sealant or construction adhesive along the flat back edges of the shelf that will contact the wall. Ensure adequate coverage for strong adhesion.
4. **Placement:** Press the shelf firmly into the marked corner position on the wall. Apply even pressure to ensure good contact with the adhesive.
5. **Support and Curing:** Use painter's tape or temporary supports to hold the shelf in place while the adhesive cures. Allow the adhesive to cure for the full duration recommended by the manufacturer before placing any items on the shelf. This can range from 24 to 72 hours.
6. **Sealing (Optional but Recommended):** Once the main adhesive has cured, apply a thin bead of silicone sealant along the top and bottom edges where the shelf meets the wall for an extra waterproof seal and a clean finish.

The corner shelf installed in a shower, holding various bath products.

Maintenance

To maintain the polished finish and longevity of your engineered marble shower shelf, follow these simple care instructions:

- **Cleaning:** Wipe the surface with a dry, soft cloth regularly to remove water spots and soap residue. For deeper cleaning, use a mild, non-abrasive cleaner specifically designed for stone or engineered surfaces. Avoid harsh chemicals, acidic cleaners, or abrasive pads, as these can damage the polished finish.
- **Spills:** Clean up spills immediately to prevent staining, especially from colored liquids or products.
- **Avoid Excessive Moisture:** While moisture resistant, prolonged exposure to standing water should be avoided. Ensure proper ventilation in the shower area.

A hand cleaning the shower shelf with a spray bottle and cloth, demonstrating proper maintenance.

Safety Information

It is crucial to adhere to the following safety guidelines for the proper use and longevity of your shower shelf:

- Always follow the manufacturer's instructions for proper installation and weight limits.

- Avoid exposing the shelf to excessive moisture or heavy loads to prevent accidents.
- Do not use the shelf as a step or support for body weight.
- Keep sharp or abrasive objects away from the surface to prevent scratches.

Troubleshooting

While the engineered marble shower shelf is designed for durability, here are some general troubleshooting tips:

- **Shelf feels loose:** This indicates insufficient adhesion during installation or a compromised bond over time. Re-installation with proper adhesive and curing is necessary. Do not overload the shelf.
- **Stains on surface:** Refer to the maintenance section for cleaning instructions. For stubborn stains, consult a professional stone cleaner or the manufacturer for specific recommendations.
- **Dull finish:** Ensure you are using non-abrasive cleaners. Regular wiping with a dry cloth and occasional use of a stone polish (if recommended by the manufacturer) can help restore shine.

Warranty and Support
