PELEGON TSR01

PELEGON Toilet Safety Rails User Manual

Model: TSR01

Introduction

Thank you for choosing the PELEGON Toilet Safety Rails. This product is designed to provide secure and stable support for individuals requiring assistance with sitting and standing from the toilet, including the elderly, those with disabilities, or individuals recovering from surgery. This manual provides detailed instructions for assembly, operation, maintenance, and troubleshooting to ensure safe and effective use of your toilet safety rails.

Package Contents

Please verify that all components are present before beginning assembly:

- Toilet Safety Rail Frame (Pre-assembled sections)
- Adjustable Legs with Non-Slip Rubber Tips
- Padded Handles
- Instruction Manual (This document)

Setup Instructions

The PELEGON Toilet Safety Rails are designed for easy, tool-free assembly. Follow these steps for proper setup:

1. **Unpack Components:** Carefully remove all parts from the packaging.
2. **Assemble Frame:** The main frame components are designed to slide and click into place. Ensure all connections are secure.
3. **Position the Rails:** Place the assembled safety rails around your toilet. The frame should sit securely on the floor, with the arms extending over the toilet bowl.

4. **Adjust Height:** To adjust the height, locate the push pins on each leg. Press the pin and slide the leg up or down to the desired height. Ensure both sides are adjusted to the same height for stability. The height is adjustable from 24 to 30 inches.
5. **Adjust Width:** To adjust the width of the handles, locate the adjustment mechanism on the horizontal bar. Press the release button or lever and slide the handles inward or outward to fit your toilet and user preference. The width is adjustable from 19 to 24.5 inches. Ensure the width is symmetrical.
6. **Verify Stability:** Before use, gently apply pressure to the handles to ensure the frame is stable and does not wobble. All pins should be fully engaged in their respective holes.

Operating Instructions

The toilet safety rails are designed to provide stable support for users. Follow these guidelines for safe operation:

- **Approaching the Toilet:** Approach the toilet and safety rails carefully. Ensure the non-slip rubber tips are firmly on the floor.
- **Using for Support:** When sitting down or standing up, grasp the padded handles firmly with both hands. Distribute your weight evenly as you lower or raise yourself. The rails are designed to support up to 350 lbs.
- **Maintaining Balance:** Always maintain your balance and use the rails for support as needed. Avoid leaning heavily on one side only.

- **Post-Surgery Use:** For individuals recovering from knee or hip surgery, the rails provide crucial assistance in maintaining proper body mechanics and reducing strain during transfers.

Care and Maintenance

Proper care and maintenance will extend the life of your PELEGON Toilet Safety Rails:

- **Cleaning:** Clean the frame regularly with a mild soap and water solution. Wipe dry immediately with a soft cloth. Avoid abrasive cleaners or solvents, as they may damage the finish.
- **Inspection:** Periodically inspect all connections, screws, and pins to ensure they are tight and secure. Check the non-slip rubber tips for wear or damage. Replace worn tips immediately to maintain stability.
- **Storage:** If not in use for an extended period, store the safety rails in a dry place away from direct sunlight and extreme temperatures. The lightweight and foldable design allows for easy storage.

Troubleshooting

If you encounter any issues with your toilet safety rails, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Rails feel unstable or wobbly.	Legs not adjusted to equal height; pins not fully engaged; loose connections.	Ensure both legs are set to the same height. Press pins fully until they click into place. Check all frame connections for tightness.

Problem	Possible Cause	Solution
Difficulty adjusting height or width.	Push pins or adjustment levers are stuck or dirty.	Clean the adjustment mechanisms. Apply a small amount of silicone spray if necessary (avoiding contact with rubber tips). Ensure no debris is obstructing the holes.
Rubber tips are slipping.	Tips are worn out; floor surface is wet or slippery.	Replace worn rubber tips. Ensure the floor around the toilet is dry and clean before use.

Product Specifications

Feature	Detail
Brand	PELEGON
Model Number	TSR01
Material	Aluminum
Color	Aluminium
Weight Capacity	Up to 350 lbs (Lab Tested)
Item Weight	5.55 pounds (2.52 Kilograms)
Product Dimensions (Max)	30"L x 24.5"W
Adjustable Height	24 - 30 inches
Adjustable Width	19 - 24.5 inches
Assembly	Tool-free assembly
Included Components	Instructions
Batteries Required	No
