# Vente-unique VARINA Double Sliding Barn Door Instruction Manual

Model: VARINA

## 1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your Vente-unique VARINA Double Sliding Barn Door. Please read this manual thoroughly before beginning installation to ensure proper setup and safe use.

Image 1.1: The Vente-unique VARINA Double Sliding Barn Door system, featuring two white door panels and a black top-mounted rail.

## 2. SAFETY INFORMATION

Always prioritize safety during installation and use.

- Ensure all components are securely fastened before use.
- Use appropriate tools and follow all local building codes.
- Keep children and pets away from the installation area.

- Heavy components may require two people for safe handling.

### 3. PACKAGE CONTENTS

Verify that all parts are present and undamaged before beginning assembly.

- 2 x Door Panels (White MDF + PVC)
- 1 x Sliding Rail (400 cm length)
- 2 x Door Handles
- Mounting Hardware (screws, anchors, rollers, floor guides, stoppers)
- Installation Accessories

### 4. SETUP AND INSTALLATION

The Vente-unique VARINA Double Sliding Barn Door is designed for easy installation. While the door panels themselves do not require complex assembly, the rail system and hardware must be properly mounted.

#### 4.1. Pre-Installation Checks

- Ensure the wall where the rail will be mounted is structurally sound and can support the weight of the doors (approx. 58.8 kg total).
- Confirm sufficient clearance above the door opening for the rail and rollers.
- The door's opening direction is reversible (left or right). Plan your desired configuration.

#### 4.2. Mounting the Sliding Rail

1. Measure and mark the desired height for the rail, ensuring the doors will clear the floor.
2. Drill pilot holes according to the rail's mounting points. Use appropriate wall anchors for your wall type.
3. Securely attach the 400 cm sliding rail to the wall using the provided hardware.

Image 4.1: Close-up view of the black sliding rail and roller mechanism, illustrating how the door panel hangs.

#### 4.3. Attaching Rollers and Handles to Doors

1. Attach the roller hangers to the top edge of each door panel.
2. Install the handles on each door panel at a comfortable height.

Image 4.2: Detail of the black handle attached to the white door panel.

#### 4.4. Hanging the Doors and Adjustments

1. Carefully lift and hang each door panel onto the rail rollers.
2. Install the floor guides to prevent the bottom of the doors from swinging.
3. Adjust the rail stoppers to control the travel distance of each door.
4. Test the sliding mechanism to ensure smooth operation. The system includes a soft-close feature for gentle closing.

Image 4.3: Close-up of the bottom floor guide, which keeps the door stable during sliding.

## 5. OPERATING INSTRUCTIONS

To operate your Vente-unique VARINA Double Sliding Barn Door, simply grasp the handle and slide the door panel along the rail. The integrated soft-close system ensures a smooth and quiet closing action, preventing abrupt impacts.

- Slide doors gently to engage the soft-close mechanism.
- Avoid forcing the doors if they encounter resistance.

## 6. MAINTENANCE

Regular maintenance will ensure the longevity and smooth operation of your sliding barn door.

### 6.1. Cleaning

- Wipe door panels (MDF + PVC) with a soft, damp cloth. Avoid abrasive cleaners.
- Clean the aluminum rail and metal components with a mild detergent solution if necessary. Aluminum is known for its robustness and low maintenance.
- Ensure the rail is free of dust and debris to maintain smooth sliding.

### 6.2. Hardware Inspection

- Periodically check all screws and fasteners for tightness.
- Inspect rollers and floor guides for wear and tear. Replace if necessary.

## 7. TROUBLESHOOTING

If you encounter issues with your sliding barn door, consider the following:

- **Doors not sliding smoothly:** Check the rail for obstructions (dust, debris). Ensure rollers are clean and properly aligned.
- **Doors scraping the floor:** Verify that the rail is mounted at the correct height and that floor guides are properly adjusted.
- **Doors not closing completely:** Adjust the rail stoppers to allow full closure. Check for any obstructions.
- **Loose hardware:** Tighten any loose screws on the rollers, handles, or rail mounts.

## 8. SPECIFICATIONS

Feature	Detail
Model	VARINA
Brand	Vente-unique
Color	White
Material	MDF, PVC, Aluminum, Wood, Metal
Door Type	Double Sliding Barn Door, Full Filling
Door Dimensions (each)	Height: 205 cm, Length: 83 cm, Depth: 3.2 cm
