Geeni GN-WA212-199

Geeni Smart Temperature and Humidity Monitor Sensor

Model: GN-WA212-199

1. Introduction

The Geeni Smart Temperature and Humidity Monitor Sensor provides real-time environmental data for various areas within your home. This wireless Wi-Fi device allows you to accurately track temperature and humidity levels, ensuring optimal conditions for comfort and preservation. With seamless integration into your smart home ecosystem, you can monitor your environment from anywhere using the Geeni app, or through voice commands with compatible smart assistants.

2. Setup Guide

Follow these steps to set up your Geeni Smart Temperature and Humidity Monitor Sensor:

1. **Download the Geeni App:** Search for "Geeni" in the Apple App Store or Google Play Store and download the application to your smartphone.
2. **Power On the Sensor:** Insert the included AAA batteries into the sensor. The device will power on automatically.
3. **Connect to Wi-Fi:** Open the Geeni app, create an account or log in, and follow the in-app instructions to add your new device. Ensure your Wi-Fi network is 2.4GHz, as the sensor is compatible only with this frequency.
4. **Mounting Options:** The sensor can be placed on a flat surface or mounted to a wall using the provided wall anchors and screws.

The package includes two sensors, six AAA batteries, one user manual, and wall anchors with screws for easy installation.

3. Operation

3.1 App Control

Use the Geeni app to monitor real-time temperature and humidity data. The app provides a comprehensive overview of your environment, allowing you to track historical data and set alerts for specific temperature or humidity ranges. This enables you to make informed decisions to maintain a comfortable and healthy indoor climate.

3.2 Voice Control

The Geeni Smart Temperature and Humidity Monitor Sensor is compatible with Amazon Alexa and Google Home. Once integrated, you can use voice commands to inquire about the current temperature or humidity in the room where the sensor is located. For example, you can ask, "Alexa, what's the temperature in the bedroom?" or "Hey Google, what's the humidity in the living room?"

Image: Voice Control with smart assistants.

3.3 Accurate Measurements

The sensors provide precise measurements with a working humidity range of 0-99.9% RH and a working temperature range of 14°F to 131°F (-10°C to 55°C). This accuracy ensures reliable data for monitoring various environments such as living rooms, nurseries, bedrooms, attics, greenhouses, basements, and pantries.

Image: Versatile monitoring in various locations.

4. Maintenance

4.1 Battery Replacement

The Geeni Smart Temperature and Humidity Monitor Sensor operates on AAA batteries. With a low quiescent current of less than or equal to 30uA, the sensors are designed for long-lasting battery life. When the battery indicator on the device or in the app shows low power, replace all three AAA batteries to ensure continuous operation and accurate readings.

4.2 Cleaning

To clean your sensor, gently wipe the exterior with a soft, dry cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the device. Ensure no moisture enters the device openings.

5. Troubleshooting

- **Device Disconnected from Wi-Fi:** If your sensor loses its Wi-Fi connection, ensure it is within range of your 2.4GHz Wi-Fi router. Try restarting the sensor by removing and reinserting the batteries. Then, attempt to re-add or reconnect the device through the Geeni app.
- **Inaccurate Readings:** Verify that the sensor is placed in an appropriate location, away from direct sunlight, drafts, or heat sources that could skew readings. Check the Geeni app settings to ensure the sampling rate is set to your desired frequency, as a less frequent sampling rate can make readings appear outdated.
- **Short Battery Life:** While designed for efficiency, battery life can vary. Ensure you are using fresh, high-quality AAA alkaline batteries. If issues persist, contact Geeni support.
- **App Connectivity Issues:** Ensure your smartphone has a stable internet connection. Try closing and reopening the Geeni app, or reinstalling it if necessary.

6. Specifications

Feature	Specification
Brand	Geeni
Model Number	GN-WA212-199
Color	White
Product Dimensions	1.97"W x 2.17"H (approximate)
Item Weight	9.1 ounces
Battery Type	AAA Alkaline (3 per sensor)
Lower Temperature Rating	14°F (-10°C)
Upper Temperature Rating	131°F (55°C)
Operating Humidity	0-99.9% RH
Mounting Type	Wall Mount / Stands on Base
Connectivity	Wi-Fi (2.4GHz only)
UPC	194383033004

7. Warranty and Support

The Geeni Smart Temperature and Humidity Monitor Sensor comes with a 1-year limited warranty. For technical support, warranty claims, or further assistance, please visit the official Geeni website or contact their customer service department. Keep your purchase receipt as proof of purchase for warranty purposes.

For the most up-to-date support information, please refer to the Geeni support page:Geeni Official Store
