Safety Information

Always prioritize safety when operating the lawn sweeper. Failure to follow these instructions may result in injury or damage to the equipment.

- **Keep Clear:** Keep children, other people, and animals away while using the appliance. The minimum safety distance is 5 meters.
- **Caution on Terrain:** Be careful to avoid slipping or falling, especially when working backward. Use extreme caution when working on or crossing gravel driveways, pavements, or roads, and remain alert to hidden hazards or traffic.
- **Pre-Operation Check:** Check the environment where the appliance will be used and remove any objects that may be caught and thrown out by the unit.
- **Personal Protective Equipment (PPE):** Always wear suitable work clothes such as sturdy shoes with non-slip soles, durable long trousers, gloves, and protective goggles. Always wear safety glasses or eye protection during operation or when making an adjustment or repair.
- **Container Handling:** When changing, lifting, or emptying the sweepings container, make sure that it is standing securely.

- **Slope Operation:** Always work across the slope with the machine. Maximum inclination of 30°. Be especially careful when changing direction on a slope, turning the appliance, or pulling it towards you.

Setup and Assembly

The VEVOR Push Lawn Sweeper is designed for straightforward assembly. All necessary tools are included in the package. Assembly typically takes less than 10 minutes.

1. **Unpack Components:** Carefully remove all parts from the packaging. Verify that all components listed in the packing list are present.
2. **Attach Support Legs:** Attach the support legs to the main sweeper body. Ensure they are securely fastened.
3. **Connect Handle:** Connect the handle sections to the support legs and to each other using the provided fasteners and quick clips. Ensure all connections are tight and stable.
4. **Attach Hopper Bag:** Securely attach the mesh collection hopper bag to the sweeper frame. The quick clip storage design allows for easy installation and removal.

Operating Instructions

The VEVOR Push Lawn Sweeper is designed for efficient collection of leaves, grass clippings, and small debris from your lawn.

Adjusting Sweeping Height

The sweeper features an adjustable height mechanism to optimize collection based on the type and amount of debris, and grass height.

- **Low Setting:** Use for collecting fine debris, twigs, or when the grass is short. This setting provides a more

aggressive sweep.

- **High Setting:** Use for sweeping larger leaves or when the grass is taller. This setting reduces resistance and makes pushing easier.

Figure 3: Height adjustment knob for optimal sweeping.

Sweeping Technique

- Push the sweeper forward at a steady pace. The spinning brushes will pick up debris and deposit it into the hopper bag.
- For best results, sweep in straight lines, overlapping slightly on each pass.
- The sweeper is most effective on dry leaves and debris. Damp or heavy debris may require multiple passes or a lower height setting.
- The sweeper features a 5:1 brush-wheel ratio and 4 rows of bristles for thorough collection across a 21-inch sweeping width.

Maintenance

Regular maintenance ensures the longevity and optimal performance of your lawn sweeper.

- **Emptying the Hopper:** The 3.5 cu. ft. mesh collection hopper bag is designed for large capacity and infrequent dumping. Once full, detach the bag using the quick clips and empty its contents into a suitable waste bin.
- **Cleaning:** After each use, clean any remaining debris from the brushes and the sweeper body. A damp cloth can be used for the exterior.
- **Storage:** Store the sweeper in a dry, covered area to protect it from the elements. The handle can be folded, and the unit can be hung on a wall for space-saving storage.

Troubleshooting

If you encounter issues with your VEVOR Push Lawn Sweeper, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Sweeper not picking up debris effectively.	Height setting is too high; debris is wet or too heavy; brushes are worn or tangled.	Adjust height to a lower setting. Wait for debris to dry. Clear any tangled material from brushes.
Sweeper is hard to push.	Height setting is too low; hopper bag is full; wheels are jammed.	Adjust height to a higher setting. Empty the hopper bag. Check wheels for obstructions.
Debris falling out of the front.	Hopper bag is overfilled.	Empty the hopper bag more frequently.

Specifications

Feature	Detail
Brand	VEVOR
Model Number	S19-001A
Material	Rubber, Steel
Color	Black
Style	Push
Item Weight	14.3 pounds (6.5 kg)
Sweeping Width	21 Inches (53.5 cm)
Number of Positions	5 (Adjustable Height)
Operation Mode	Manual
Hopper Capacity	3.5 cu. ft.
Brush-Wheel Ratio	5:1
Product Dimensions (L x W x H)	44.1 x 26.4 x 35.4 inches (112 x 67 x 90 cm)
