GAZEBEST PG01

GAZEBEST Patio Pergola User Manual

Model: PG01

INTRODUCTION

This user manual provides essential information for the assembly, operation, and maintenance of your GAZEBEST Patio Pergola with Retractable Canopy. Designed for outdoor living spaces, this pergola offers a versatile solution for sun shade and shelter, featuring a weather-resistant steel frame and a retractable canopy. Please read this manual thoroughly before installation and use to ensure safe and proper operation.

The GAZEBEST Patio Pergola (Model: PG01) measures approximately 10 feet in length, 10 feet in width, and 6.6 feet in height. It is constructed from durable polyester, aluminum, and metal components, designed to withstand wind rates up to 40 MPH.

SAFETY INFORMATION

Your safety is paramount. Adhere to the following guidelines during installation, operation, and maintenance:

- Always check the instructions carefully before beginning installation.
- It is recommended that 1-2 people assist with the installation process for efficiency and safety.
- For safer and more efficient installation, utilize appropriate tools such as a ladder, protective gloves, and an electric wrench.
- Regularly clear snow from the roof to prevent accumulation and potential damage, especially in areas with heavy snowfall.
- Take protective measures, such as retracting the canopy or securing the structure, when wind speeds approach or exceed the rated value of 40 MPH.
- Before purchasing and installing, consult your local city, municipality, and applicable HOA guidelines for building codes and zoning requirements. A license may be required for this structure in some areas.
- If any parts are damaged during shipping or assembly, do not proceed with installation. Contact customer service for assistance.

PACKAGE CONTENTS

Before beginning assembly, verify that all components are present and undamaged. The package includes:

- Two (2) boxes containing aluminum frame components.
- One (1) Anti-UV Tarpaulin (retractable canopy).

- Installation Accessories (hardware, fasteners, etc.).
- Assembly Instructions Manual.

SETUP AND ASSEMBLY

Assembly of the GAZEBEST Patio Pergola requires careful attention to detail. Follow the provided assembly instructions manual step-by-step. While the process is designed for user assembly, having 1-2 helpers is highly recommended.

Key Assembly Steps:

1. **Frame Assembly:** Begin by assembling the solid steel frame components. Ensure all connections are secure and tightened according to the instructions. The frame is designed for stability and features a UV-fighting PU coating.
2. **Canopy Installation:** Install the retractable canopy onto the frame. The canopy is divided into two pieces, designed to slide easily along the slotted frame.
3. **Securing the Structure:** The pergola features triangular sections on the roof for added stability. The four individual feet of the frame have openable covers, allowing you to nail down the structure with ground stakes for reinforcement directly into the ground. This step is crucial for stability, especially in windy conditions.

OPERATING INSTRUCTIONS

The primary operational feature of your GAZEBEST Patio Pergola is its retractable canopy, designed for flexible shade control.

Retracting and Extending the Canopy:

- The outdoor pergola's canopy is divided into two pieces. These pieces can be moved independently or connected to move together.
- Utilize the slotted design to easily slide the canopy sections. This allows you to fully customize the level of shade throughout the day, adapting to changing sun positions or weather conditions.
- To extend the canopy, gently pull the sections outwards along their tracks until the desired coverage is achieved.
- To retract the canopy, push the sections inwards along their tracks to expose more of the area to sunlight or to protect the canopy during adverse weather.

Adjustable Canopy

Retractable sidewalls can be flexibly adjusted according to your needs.

Durable Awning

The high-quality tarpaulin can shade away harmful UV and keep you comfy.

MAINTENANCE

Proper maintenance will extend the lifespan and preserve the appearance of your pergola.

- **Snow Removal:** In regions with snowfall, regularly clear snow from the canopy to prevent excessive weight accumulation, which could damage the structure.
- **Wind Protection:** During periods of high wind (approaching or exceeding 40 MPH), it is advisable to fully retract the canopy to minimize wind resistance and prevent potential damage to the fabric or frame. Consider additional anchoring if your area experiences frequent strong winds.
- **Cleaning:** Clean the frame with a mild soap and water solution. For the canopy fabric, use a soft brush or cloth with mild detergent and rinse thoroughly. Allow the canopy to dry completely before retracting for extended periods.
- **Inspection:** Periodically inspect all bolts, screws, and connections to ensure they remain tight. Re-tighten as necessary. Check the canopy fabric for any tears or wear and address them promptly.

TROUBLESHOOTING

This section addresses common issues you might encounter with your pergola. For problems not listed here, please contact customer support.

Problem	Possible Cause	Solution
Difficulty during assembly.	Incorrect part orientation; missing or damaged parts; insufficient assistance.	Review the assembly instructions carefully, ensuring all parts are oriented correctly (e.g., A1 vs. A2 posts). Confirm all parts are present before starting. Seek assistance from 1-2 people. If parts are missing or damaged, contact customer service.
Canopy does not slide smoothly.	Obstruction in the tracks; dirt or debris; misaligned canopy sections.	Inspect the canopy tracks for any obstructions or debris and clear them. Ensure the canopy sections are properly aligned within their tracks. Clean the tracks if necessary.
Pergola feels unstable.	Loose connections; insufficient anchoring to the ground.	Check and tighten all bolts and fasteners on the frame. Ensure the pergola is properly anchored to the ground using the provided ground stakes, especially if installed on soft surfaces.
Water pooling on canopy.	Canopy not fully taut; heavy rainfall.	Ensure the canopy is fully extended and taut. While the canopy is water-resistant, heavy rainfall may cause some pooling. Retract the canopy during heavy rain to prevent excessive water accumulation.

SPECIFICATIONS

Feature	Detail
Brand	GAZEBEST
Model Number	PG01
Product Dimensions	120"L x 120"W x 93.6"H (10'L x 10'W x 7.8'H)
Material	Polyester, Aluminum, Alloy Steel, Polyurethane
Frame Material	Aluminum
Color	Flat top (Beige/Tan canopy)
Water Resistance Level	Water Resistant
UV Protection	Yes
Assembly Required	Yes
Wind Rate	Up to 40 MPH
