## 4. ASSEMBLY INSTRUCTIONS

Assembly is designed to be straightforward and can typically be completed within 30 minutes with two people. Ensure you have ample space and refer to the labeled parts.

### Step 1: Unpack and Identify Parts

Carefully unpack all components from the packaging. Lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided labels and compare them with the package contents list.

### Step 2: Attach Side Rails to Headboard

Align the side rails (B, C) with the pre-drilled holes on the headboard (A). Secure them using the appropriate bolts and washers from the hardware pack (H). Do not fully tighten bolts until all major components are connected.

### Step 3: Attach Footboard

Connect the footboard (D) to the open ends of the side rails (B, C). Use the designated bolts and washers, ensuring a snug fit. Once all four main frame pieces are connected, you may now fully tighten all bolts.

#### Step 4: Install Center Support Beam and Legs

Attach the center support beam (E) to the designated brackets on the headboard and footboard. Screw in the adjustable support legs (F) to the center beam. Adjust the leg height to ensure the beam is level and provides firm support to the frame.

#### Step 5: Place Wood Slats

Unroll or place the wood slats (G) across the bed frame. The slats are designed with velcro strips to prevent shifting and reduce noise. Ensure each slat is properly seated and secured to the side rails.

#### Step 6: Connect Charging Station Power

Locate the power cord for the integrated charging station. Plug it into a standard wall outlet. Test the USB and AC outlets to ensure they are functioning correctly.
