#### STRICH LOOPER&DRUM

## STRICH Stereo Looper Pedal with Built-in Drum Machine

Model: LOOPER&DRUM
Brand: STRICH

#### 1. Introduction

The STRICH Stereo Looper Pedal is a versatile 2-in-1 device combining a powerful looper with a comprehensive drum machine. Designed for guitarists and musicians, it offers extensive recording capabilities and a wide array of rhythmic patterns to enhance practice, composition, and live performance. This manual provides essential information for setting up, operating, maintaining, and troubleshooting your pedal.

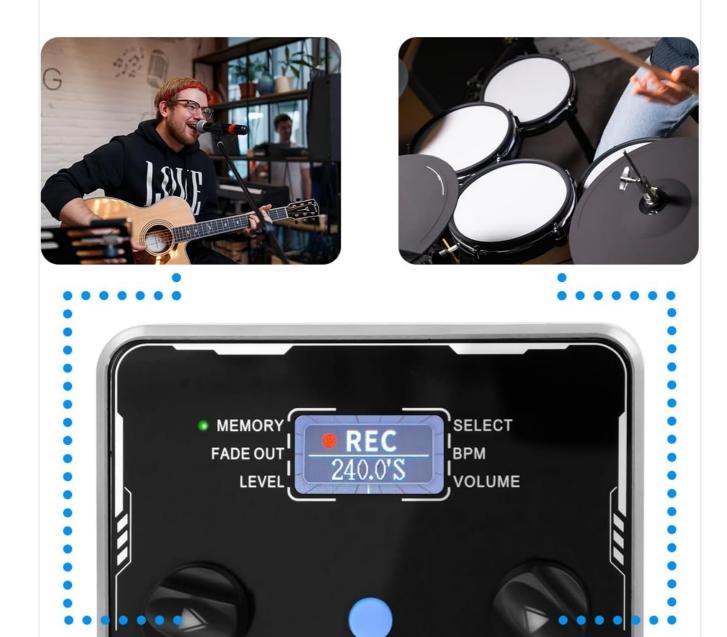

Front view of the STRICH Stereo Looper Pedal, showcasing its controls and display.

- 2-in-1 Design: Integrates a looper and drum machine for combined creative and rhythmic practice needs.
- **Powerful Looper:** Stores 40 presets, each with a maximum recording time of 4 minutes, totaling 160 minutes. Features a 24-bit/44.1kHz DSP chip for accurate sound reproduction.
- **Versatile Drum Machine:** Offers 10 different drum styles, each with 10 unique rhythmic patterns, providing 100 diverse drum patterns (pop, rock, metal, Latin, blues, jazz, fusion, hip-hop, funk, disco).
- **Dual Inputs/Outputs:** Two mono 1/4" inputs for simultaneous instrument and microphone connection, and two mono 1/4" outputs for stereo output.
- USB Connectivity: Supports audio upload and download, and software editing for loop management.
- Footswitch Control: Allows for hands-free operation during performance.

## 2 in 1 LOOPER+DRUM MACHINE

Meet music creation and practice needs at the same time

The pedal's 2-in-1 design combines looper and drum machine functionalities.

**MERGER CTRL** 

**HOLD FOR DELETE** 

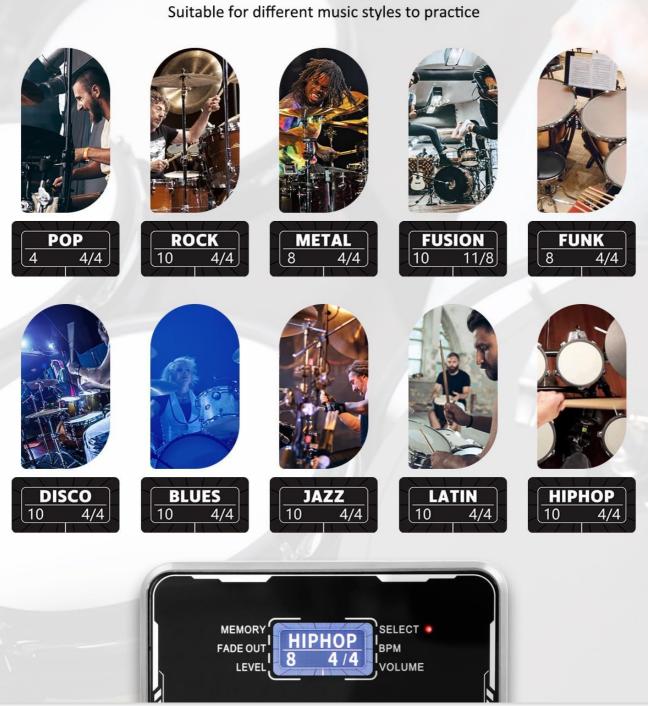

**RHYTHM** 

LOOPER

# **160** mins **HUGE LOOP CAPACITY** Creative inspiration is no longer limited 40 PRESETS **REC** 240.0'S LOOPER OPER&DRUM RHYTHM

The looper offers a substantial 160 minutes of total recording time across 40 presets.

## **100** DRUM **GROOVES**

Explore 100 diverse drum patterns across various musical genres.

#### 3. SETUP GUIDE

#### 3.1 Power Supply

The STRICH Stereo Looper Pedal requires a 9V DC, minimum 300mA, center-negative adapter. The power supply is not included with the pedal. Using an incorrect adapter may damage the device. There is no battery compartment.

### **STRICH Looper&Drum Effect Pedal**

#### **CORRECT POWER SOURCE**

Use 9V DC power supply with at least 300mA center-negative adapter to avoid performance issues or noise problems.

#### **POWER SUPPLY NOT INCLUDED**

The product does not come with a power adapter, and users must purchase a compatible effector power adapter separately as per the requirements.

#### PROPER SIGNAL CONNECTION

The product features two mono R/L channels. Correct matching of input to output (R to R, L to L) is necessary for normal signal transmission.

Ensure correct power supply (9V DC, 300mA, center-negative) and proper signal connections.

#### 3.2 Connections

The pedal features dual inputs and outputs for versatile connectivity:

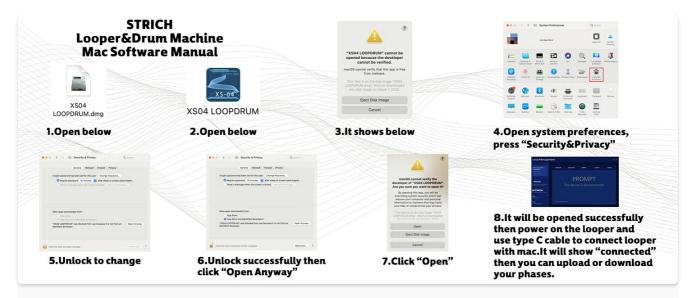

- Input R (Mono): Connect your instrument (e.g., guitar) here for mono input.
- Input L (Mono): Connect a second instrument or microphone here. Connect both L and R inputs for stereo input.
- Output L (Mono): Connect to your amplifier or audio interface. Connect both L and R outputs for stereo output.
- Output R: Connect to your amplifier or audio interface.
- EXT CTRL: For connecting an external footswitch (purchased separately).
- USB (Type-C): Connect to a computer for editor software, import/export files, or factory reset.

## 2 INPUT/2 OUTPUT

Support microphone and instrument loop at the same time

The pedal supports dual input and output for stereo or multi-instrument setups.

Example connection setup for the looper pedal with instruments and output devices.

#### 4. OPERATING INSTRUCTIONS

#### 4.1 Controls Overview

Detailed view of the pedal's controls and their functions.

- LOOPER Control: Adjusts loop position, volume, and fade out time.
- LOOPER LED: Indicates current looper parameters.
- Display Screen: Shows current status information.
- RHYTHM LED: Indicates current rhythm parameters.
- **MERGER CTRL (Hold for Delete):** Toggles independent/simultaneous operation of looper and drum machine. Hold to delete recorded tracks.
- RHYTHM Control: Selects rhythm type, speed (BPM), and volume.
- **Right Footswitch (STOP/PLAY/CLEAR):** Controls playback, stop, and clear functions for the looper. Also controls Play/Stop for the drum machine.
- Left Footswitch (REC/DUB/TAP): Controls record, dub, and playback in looper mode. Taps tempo for rhythm.

#### 4.2 Looper Operation

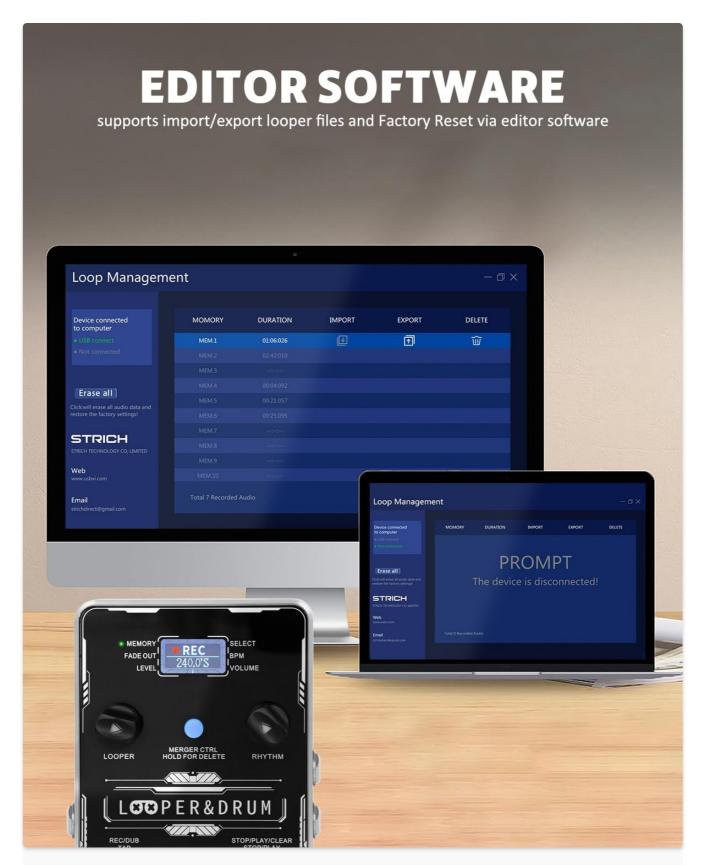

- 1. **Recording:** Press the Left Footswitch (REC/DUB) once to start recording. The screen will show 'REC' and the recording time.
- 2. Playback: Press the Left Footswitch again to stop recording and start playback. The screen will show 'PLAY'.
- 3. **Dubbing:** During playback, press the Left Footswitch again to start dubbing (overdubbing). The screen will show 'DUB'.
- 4. Stop: Press the Right Footswitch (STOP/PLAY/CLEAR) once to stop playback/dubbing.
- 5. Clear: While stopped, hold the Right Footswitch to clear the current loop.
- 6. Select Memory: Use the LOOPER control knob to navigate through the 40 memory slots.

#### 4.3 Drum Machine Operation

- 1. Select Drum Pattern: Use the RHYTHM control knob to select from 100 diverse drum patterns.
- 2. **Adjust BPM:** Press the RHYTHM control knob to enter BPM adjustment mode, then turn the knob to change the tempo.
- 3. **Adjust Volume:** Press the RHYTHM control knob again to enter volume adjustment mode, then turn the knob to change the drum volume.
- 4. Tap Tempo: Tap the Left Footswitch (REC/DUB/TAP) multiple times to set the tempo for the drum machine.

#### 4.4 USB Functionality and Software

The pedal supports USB Type-C connectivity for managing your loops and settings via computer software. This allows for importing/exporting recorded files and performing factory resets.

Manage your loops and settings using the dedicated editor software.

#### 4.5 Instructional Videos

#### 5. MAINTENANCE

- Cleaning: Use a soft, dry cloth to clean the pedal's surface. Avoid using abrasive cleaners or solvents.
- Storage: Store the pedal in a cool, dry place away from direct sunlight and extreme temperatures.
- Handling: Handle the pedal with care to prevent damage to the footswitches and knobs. Avoid dropping or subjecting it to strong impacts.
- Power Disconnection: Always disconnect the power supply when the pedal is not in use for extended periods.

#### 6. TROUBLESHOOTING

- **No Power:** Ensure the correct 9V DC, 300mA, center-negative power adapter is connected securely. Check the power outlet.
- **No Sound:** Verify all audio cables are correctly connected to inputs and outputs. Check instrument and amplifier volume levels. Ensure the pedal's volume is not set to zero.
- **Distorted Sound:** Check input levels to avoid clipping. Ensure proper impedance matching with your instruments and amplifier.
- Loop Not Recording/Playing: Ensure you are in the correct mode (REC/PLAY). Check if the memory slot is full or corrupted (try clearing it).
- Drum Machine Issues: Verify drum volume is up. Ensure a drum pattern is selected.
- **Software Connection Issues:** Ensure the USB cable is securely connected. Try a different USB port or cable. Restart your computer and the pedal.
