

F9 BARC

F9 BARC Concrete Rust Remover User Manual

Brand: Generic | Model: F9 BARC

INTRODUCTION

The F9 BARC Concrete Rust Remover is designed to effectively eliminate orange battery acid burn, rust, and fertilizer stains from various outdoor surfaces. This biodegradable, non-abrasive, and non-flammable concentrate restores concrete to its natural gray color without the need for complex mixing or messy pastes. It is formulated for use on concrete, bricks, pavers, tile, asphalt, and concrete coatings.

SETUP

Before application, ensure the area is clear of debris. The F9 BARC concentrate needs to be mixed with clean water. One gallon of F9 BARC can make 1.5 to 3 gallons of cleaner, depending on the severity of the stain and desired concentration. Always use clean water for mixing.

For optimal application, a pressure washer with a soap container is recommended. Pour the mixed solution into the pressure washer's soap container. Refer to your pressure washer's manual for specific instructions on filling the soap container and adjusting settings for chemical application.

OPERATING INSTRUCTIONS

- 1. Preparation:** Ensure the surface to be cleaned is dry. Apply the F9 BARC solution evenly over the stained area using a pressure washer or a suitable sprayer.
- 2. Dwell Time:** Allow the solution to sit on the surface for a few moments. The exact dwell time may vary based on stain

severity and surface type. Do not let the solution dry on the surface.

3. **Agitation (Optional):** For stubborn stains, gently agitate the area with a power washing scrub brush or a stiff-bristled brush.
4. **Rinsing:** Thoroughly rinse the treated area with a pressure washer or a garden hose with strong pressure. Ensure all cleaner residue is removed.
5. **Repeat if Necessary:** For very old or deep stains, a second application may be required.

Important Safety Information:

- Do not use F9 BARC on glass surfaces.
- Always test on an inconspicuous area first to ensure compatibility and desired results.
- Wear appropriate personal protective equipment (PPE) such as gloves and eye protection during handling and application.
- Keep out of reach of children and pets.

MAINTENANCE

Store F9 BARC Concrete Rust Remover in its original container in a cool, dry place, away from direct sunlight and extreme temperatures. Ensure the cap is tightly sealed after each use to maintain product efficacy. The product does not lose strength over time when stored correctly.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Stains not fully removed after first application.	Stains are old, deep, or highly concentrated.	Apply a second treatment. Ensure adequate dwell time and consider gentle agitation with a brush before rinsing.
Product not dispensing correctly from pressure washer.	Incorrect pressure washer settings or clogged soap container/nozzle.	Check your pressure washer manual for proper chemical application settings. Clean the soap container and nozzle. Ensure the solution is not too thick if diluted less.
Surface appears discolored or damaged.	Product used on an unsuitable surface or left on too long.	Always test on an inconspicuous area first. Ensure product is not used on glass. Rinse thoroughly after recommended dwell time.

SPECIFICATIONS

- **Brand:** Generic
- **Item Form:** Liquid
- **Scent:** Orange
- **Specific Uses For Product:** Floor
- **Material Feature:** Biodegradable, Natural
- **Manufacturer:** F9
- **Coverage:** One gallon covers an area of 400 to 800 square feet of concrete.
