hOmeLabs Dehumidifier Drain Hose

hOmeLabs Dehumidifier Drain Hose Instruction Manual

Model: Dehumidifier Drain Hose

PRODUCT OVERVIEW

The hOmeLabs Dehumidifier Drain Hose is designed to provide continuous drainage for your dehumidifier, eliminating the need to manually empty the water tank. This flexible PVC hose features a $\frac{3}{4}$ -inch threaded connection with a solid brass fitting and an included washer, ensuring a leak-free and secure attachment. Its durable construction allows for easy bending and twisting without kinking or leaking, making it an efficient and convenient solution for maintaining optimal humidity levels in your home.

COMPATIBILITY

This drain hose is specifically designed to fit hOmeLabs dehumidifiers. It is compatible with the following hOmeLabs dehumidifier models:

- 22 Pint hOmeLabs Dehumidifiers
- 35 Pint hOmeLabs Dehumidifiers
- 40 Pint hOmeLabs Dehumidifiers
- 50 Pint hOmeLabs Dehumidifiers

SETUP AND INSTALLATION

Follow these simple steps to install your hOmeLabs Dehumidifier Drain Hose for continuous drainage:

1. **Prepare the Dehumidifier:** Ensure your dehumidifier is turned off and unplugged before beginning installation. Locate the continuous drain outlet on the back or side of your dehumidifier.
2. **Insert Washer:** Place the included washer securely into the threaded connector of the drain hose. This washer is crucial for creating a leak-free seal.
3. **Attach the Hose:** Carefully attach the brass fitting of the drain hose to the dehumidifier's continuous drain outlet. Turn the fitting clockwise until it is hand-tight. The solid brass fitting swivels to make connection easy. Do not overtighten.
4. **Route the Hose:** Run the unfinished end of the hose to a suitable water drain. This could be a floor drain, a sink, or any other appropriate drainage point. Ensure the hose has a continuous downward slope to allow for gravity drainage and prevent water from pooling in the hose.

OPERATING INSTRUCTIONS

Once the drain hose is securely connected and routed to a drain, you can operate your dehumidifier as usual. The hose will automatically facilitate continuous drainage, meaning you will not need to manually empty the dehumidifier's water tank. This allows for uninterrupted operation, especially beneficial during humid seasons or in areas requiring constant dehumidification.

MAINTENANCE

To ensure the longevity and optimal performance of your hOmeLabs Dehumidifier Drain Hose, consider the following maintenance tips:

- **Regular Inspection:** Periodically check the hose for any signs of wear, cracks, or damage. Inspect the connections at both the dehumidifier and the drain point to ensure they remain tight and leak-free.
- **Cleaning:** If you notice any buildup or blockages within the hose, disconnect it from both ends and flush it with warm, soapy water. A mild bleach solution can be used to prevent mold or mildew growth, if necessary. Rinse thoroughly with clean water.
- **Proper Storage:** When not in use, store the hose in a clean, dry place, away from direct sunlight and extreme temperatures. Avoid kinking or sharply bending the hose during storage to prevent permanent damage.
- **Washer Check:** The rubber washer inside the brass fitting can degrade over time. If you experience leaks at the connection point, inspect the washer and replace it if it appears worn or damaged.

TROUBLESHOOTING

If you encounter issues with your dehumidifier drain hose, refer to the following common problems and their solutions:

Problem	Possible Cause	Solution
Water leaking from connection point	Loose connection, missing or damaged washer, incorrect hose size.	Ensure the brass fitting is hand-tight. Check if the washer is properly seated or if it needs replacement. Verify the dehumidifier's drain outlet size matches the hose's 3/4-inch connection.
Water not draining (dehumidifier tank fills up)	Hose is kinked or blocked, insufficient downward slope, drain point is elevated.	Check the entire length of the hose for kinks or obstructions. Ensure the hose has a continuous downward slope from the dehumidifier to the drain. The drain point must be lower than the dehumidifier's drain outlet for gravity drainage.
Slow drainage	Partial blockage in hose, minor kinking, or debris in the dehumidifier's drain outlet.	Flush the hose to clear any partial blockages. Straighten any minor kinks. Inspect the dehumidifier's drain outlet for debris and clean if necessary.

SPECIFICATIONS

- **Brand:** hOmeLabs
- **Model:** Dehumidifier Drain Hose
- **Color:** Black
- **Connection Size:** 3/4 Inch (threaded)
- **Length:** 5 Feet (5')
- **Material:** Flexible PVC with Solid Brass Fitting and Steel Valve
- **Special Feature:** Leak Resistant
- **Product Dimensions:** 8.6 x 1.2 x 10.8 inches (packaging/coiled)
- **Item Weight:** 10.2 ounces

- **UPC:** 810049721596
- **Manufacturer:** hOmeLabs
- **Date First Available:** August 25, 2023
