Spigen iPhone 16/15

Spigen EZ Fit Tempered Glass Screen Protector for iPhone 16 / iPhone 15

Model: iPhone 16/15 | Brand: Spigen

PRODUCT OVERVIEW

The Spigen EZ Fit Tempered Glass Screen Protector is designed to provide robust protection for your iPhone 16 or iPhone 15 screen. Featuring 9H hardness, it guards against scratches and minor impacts. The oleophobic coating helps resist fingerprints and smudges, maintaining screen clarity. Its EZ Fit installation system ensures a precise, bubble-free application.

WHAT'S INCLUDED

Your Spigen EZ Fit package contains the following items:

- Screen Protector (2 Count)
- Alignment Tool (EZ Fit Tray)
- Wet Wipe
- Dry Wipe
- Micro Fiber Cloth

SETUP AND INSTALLATION

Follow these steps for a precise and bubble-free installation using the EZ Fit alignment tray.

1. **Clean the Screen:** Use the provided wet wipe to thoroughly clean your iPhone screen. Follow with the dry wipe to remove any moisture. Finish by gently polishing the screen with the microfiber cloth to eliminate dust and smudges. Ensure the screen is completely free of dust particles.
2. **Position the Alignment Tray:** Place the EZ Fit alignment tool over your iPhone. It is designed to fit snugly and correctly orient the screen protector.
3. **Apply the Screen Protector:** Carefully peel off the protective film from the adhesive side of the screen protector. Align the screen protector with the top edge of the alignment tray and gently lower it onto your phone screen. The tray will guide it into the correct position.
4. **Press and Adhere:** Once the protector is in place, gently press down on the center of the screen protector. The adhesive will begin to spread. You can use your finger or the edge of a credit card (wrapped in the microfiber cloth) to gently push out

any remaining air bubbles towards the edges.

5. **Remove the Tray:** Once the screen protector is fully adhered and free of bubbles, carefully remove the EZ Fit alignment tray.
6. **Final Polish:** Use the microfiber cloth to give the screen a final polish.

OPERATING AND FEATURES

The Spigen EZ Fit screen protector is designed to integrate seamlessly with your iPhone's functionality.

- **Crystal Clear Display:** The protector maintains the original screen brightness and color accuracy, ensuring an uncompromised viewing experience.
- **Responsive Touch:** Enjoy full touch sensitivity and haptic feedback without any interference from the screen protector.
- **Oleophobic Coating:** An advanced oleophobic layer resists fingerprints and smudges, keeping your screen clean with minimal effort.
- **Case Friendly Design:** Engineered to be compatible with most phone cases, including Spigen cases, preventing lifting or interference.
- **9H Hardness:** Provides robust protection against daily scratches from keys, coins, and other sharp objects.

MAINTENANCE

To ensure the longevity and clarity of your screen protector, follow these simple maintenance guidelines:

- **Regular Cleaning:** Use the provided microfiber cloth to gently wipe the screen protector daily to remove dust and fingerprints.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, alcohol, or ammonia-based solutions, as these can damage the oleophobic coating.
- **Gentle Handling:** While the protector is durable, avoid unnecessary sharp impacts or excessive pressure on the screen.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Bubbles After Installation:**

- *Small Bubbles*: Many small bubbles will naturally dissipate within 24-48 hours.
 - *Large Bubbles*: Gently lift the nearest corner of the screen protector and slowly re-apply, pushing the bubble out with the microfiber cloth. Ensure no dust is trapped underneath.
- **Dust Trapped Underneath:**
 - If dust is visible, carefully lift the nearest corner of the screen protector. Use a dust removal sticker (if available, or clear tape) to gently dab the dust particle off the screen or the adhesive side of the protector. Re-apply slowly.
 - **Misalignment:**
 - If the protector is significantly misaligned, carefully lift it off completely. Re-clean the screen thoroughly and attempt re-installation using the EZ Fit alignment tray.
 - **Edges Not Sticking:**
 - Ensure the screen is perfectly clean and free of oils or residue. Press firmly along the edges for a few seconds. If the issue persists, it might be due to a phone case pushing against the protector; try a different case or ensure the case is not interfering.
