- Read all instructions thoroughly before proceeding. Professional installation is recommended.

4.2. Undermount Installation Steps

1. **Prepare Countertop:** Ensure the countertop opening is correctly sized for the sink. Use the provided template (if applicable) or the sink itself to trace the opening.
2. **Clean Surfaces:** Clean the underside of the countertop and the rim of the sink thoroughly to ensure proper adhesion.
3. **Apply Sealant:** Apply a continuous bead of silicone sealant around the rim of the sink where it will contact the countertop.
4. **Position Sink:** Carefully lift the sink and align it with the countertop opening from below. Press firmly to ensure good contact with the sealant.
5. **Secure with Clips:** Attach the mounting clips to the underside of the countertop and tighten them evenly to secure the sink in place. Do not overtighten.

6. MAINTENANCE AND CARE

Proper care will ensure the longevity and appearance of your ARIEL porcelain sink.

6.1. Daily Cleaning

- Wipe the sink with a soft, dry cloth after each use to prevent water spots and mineral buildup.
- For general cleaning, use a mild soap or non-abrasive cleaner with a soft sponge or cloth.
- Rinse thoroughly with clean water and dry completely.

6.2. Avoiding Damage

- Avoid using abrasive cleaners, scouring pads, or harsh chemicals (e.g., strong acids, bleach) as these can damage the porcelain finish.
- Do not drop heavy or sharp objects into the sink, as this can cause chips or cracks.

- Promptly clean any spills of staining agents (e.g., hair dye, nail polish) to prevent permanent discoloration.

7. TROUBLESHOOTING

7.1. Slow Drainage

- **Cause:** Clog in the drain or P-trap.
- **Solution:** Remove the drain stopper and clear any visible debris. If the clog persists, disassemble and clean the P-trap. Avoid using harsh chemical drain cleaners that can damage plumbing.

7.2. Leaks Around Drain

- **Cause:** Improperly sealed drain assembly or loose connections.
- **Solution:** Tighten all connections on the drain assembly. If the leak continues, disassemble the drain, reapply plumber's putty or silicone sealant, and reassemble.

7.3. Water Spots/Stains

- **Cause:** Hard water deposits or residue from products.
- **Solution:** Use a mild vinegar solution (diluted with water) to gently scrub away mineral deposits. Rinse thoroughly. For other stains, use a non-abrasive bathroom cleaner.
