BRIMFORD B0C9ZZDK7F

BRIMFORD 2-Key Copy Paste Keyboard Instruction Manual

Model: B0C9ZZDK7F | Brand: BRIMFORD

1. Introduction

The BRIMFORD 2-Key Copy Paste Keyboard is a compact, mechanical keypad designed to streamline repetitive tasks and enhance efficiency for various applications, including office work, programming, and rhythm games. This manual provides detailed instructions for setting up, operating, maintaining, and troubleshooting your device.

2. Package Contents

Please verify that all items are present in your package:

- BRIMFORD 2-Key Copy Paste Keyboard
- USB-C Cable
- Keycap Puller (for hot-swapping)

- Additional Swappable Keycaps (e.g., black 'Copy' and 'Paste' keycaps, blank white keycaps)
- Anti-slip Mats

3. Setup

3.1 Hardware Connection

1. Connect the provided USB-C cable to the USB-C port on the back of the BRIMFORD 2-Key Keyboard.
2. Plug the other end of the USB-C cable into an available USB port on your computer (PC, Laptop, or Tablet).
3. The keyboard is plug-and-play and should be recognized by your operating system automatically.

Image 3.1: The keyboard connected via its USB-C cable.

3.2 Software Installation & Configuration

To customize the keyboard's functions and LED lighting, you need to use the dedicated software. The software is compatible with Windows 7 and above, iOS, and Android.

1. Visit the official website: sikaicase.com/blogs/news/before-software-setting.
2. Download and install the configuration software for your operating system.
3. **Mac User Notice:** If you intend to use the keyboard with a Mac, you must perform the initial setup and programming on a Windows system first. The settings will be saved to the keyboard's internal memory.
4. Once the software is launched and the keyboard is connected, you can assign various functions to each key, including:
    - Shortcut keys (e.g., Cut, Undo, Redo, Select All)
    - Multimedia controls (e.g., Play, Pause, Volume, Switch Song)
    - Custom scripts
    - Mouse functions
5. After configuring your desired functions, click the "Download" or "Save" button within the software to apply the changes to the keyboard.

4. Operating Instructions

4.1 Default Functions

Out of the box, the BRIMFORD 2-Key Keyboard is pre-programmed with the following default functions:

- **Left Key:** Copy (Ctrl+C on Windows)
- **Right Key:** Paste (Ctrl+V on Windows)

Simply press the respective key to execute the Copy or Paste command.

4.2 Custom Functions

After programming custom functions using the software (as described in Section 3.2), simply press the assigned key to trigger its corresponding action. The keyboard supports multiple layers of programming, allowing for a wide range of customized shortcuts and macros.

Image 4.2: Examples of how the keyboard can be used for different tasks like recording, Excel, programming, and gaming.

4.3 LED Lighting

The keyboard features RGB backlighting with 7 colors and 2 modes (gradient or light up on key press). You can adjust or turn off the LED lights through the configuration software:

- Connect the keyboard and open the software.
- Navigate to the "Light Adjustment" section.
- Select from the available 7 colors and 2 modes.
- To turn off the lights, select "LED_Modes_0".
- Click "Download" or "Save" to apply the changes.

Image 4.3: Software options for adjusting LED lighting modes and colors.

5. Maintenance

5.1 Cleaning

- Disconnect the keyboard from your computer before cleaning.
- Use a soft, dry cloth to wipe the surface of the keyboard.
- For stubborn dirt, a slightly damp cloth can be used, ensuring no liquid enters the device.
- Do not use harsh chemicals or abrasive cleaners.

5.2 Hot-Swappable Keys

The BRIMFORD 2-Key Keyboard features hot-swappable switches, allowing you to easily change keycaps and key switches without soldering.

1. Use the provided keycap puller to gently remove the keycap from the switch.
2. Use a switch puller (not included, but often comes with custom keycap sets) to carefully remove the key switch from the PCB.
3. Align the pins of the new key switch with the holes on the PCB and press firmly until it clicks into place.
4. Place the desired keycap onto the new switch.

6. Troubleshooting

- **Device Not Recognized:** Ensure the USB-C cable is securely connected to both the keyboard and your computer. Try a different USB port or cable.
- **Keys Not Responding:** Verify that the keyboard is properly connected. If custom functions were programmed, ensure they were saved correctly to the device via the software.
- **LED Lights Not Working/Incorrect:** Check the LED settings in the configuration software and ensure they are saved to the device.
- **Software Issues:** Ensure you have downloaded the correct software version from the official website. Restart the software and/or your computer.
