## Zingbabu PL0019

# Zingbabu Softbox Lighting Kit User Manual

Model: PL0019

Brand: Zingbabu

## INTRODUCTION

---

Thank you for choosing the Zingbabu Softbox Lighting Kit. This professional studio lighting solution is designed to provide uniform and soft illumination for various photography and videography needs. This manual will guide you through the setup, operation, and maintenance of your new lighting kit to ensure optimal performance and longevity.

## WHAT'S INCLUDED

Your Zingbabu Softbox Lighting Kit includes the following components:

- 1 x Softbox (20" x 28" / 50 x 70cm)
- 1 x 25W/5500K E27 LED Bulb
- 1 x Adjustable Tripod Stand (27" to 80" / 68cm to 200cm height)
- 1 x White Soft Cover (External Diffuser)
- 1 x User Manual (this document)

## SETUP INSTRUCTIONS

1. **Unpack Components:** Carefully remove all items from the packaging.
2. **Set Up Tripod Stand:**
  - Extend the legs of the tripod stand to form a stable base.
  - Tighten the rotate button for fixed tripod to secure the legs.
  - Adjust the height of the tripod stand using the height adjustment knobs. The stand can extend from 27 inches (68cm) to 80 inches (200cm).

### 3. Install LED Bulb:

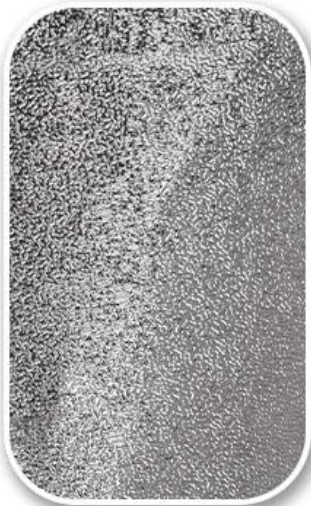

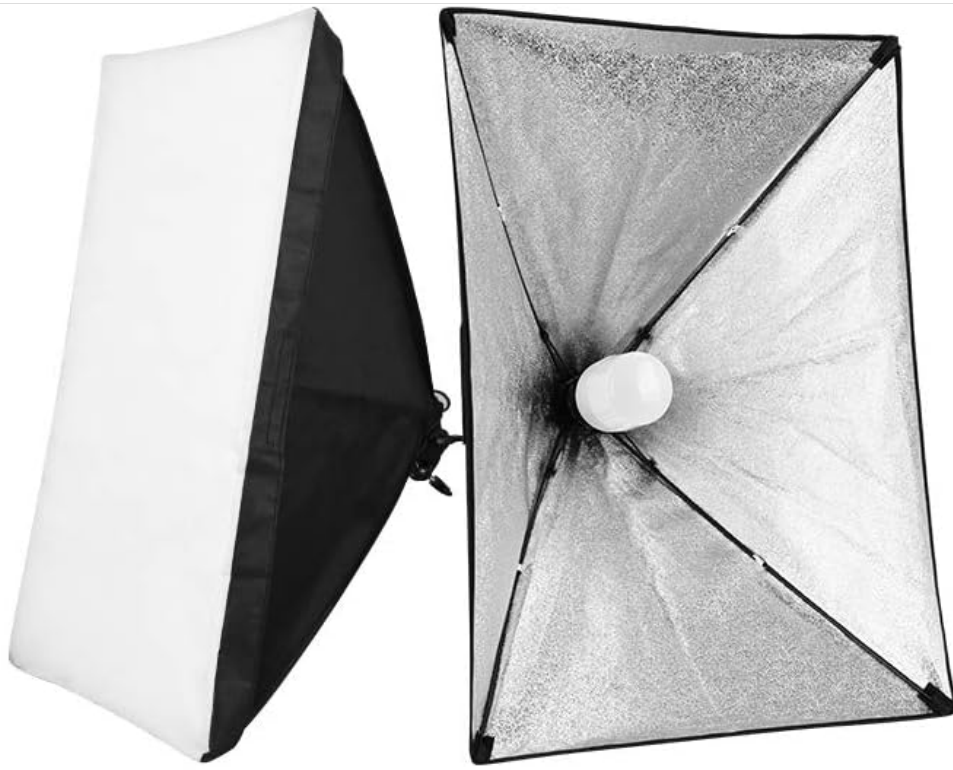

- Gently screw the 25W/5500K E27 LED bulb into the E27 lamp holder located inside the softbox. Ensure it is securely fastened but do not overtighten.

Image: Close-up of the 25W/5500K E27 LED bulb, showing its dimensions and energy-saving features.

#### 4. Assemble Softbox:

- Open the softbox. The internal reflective fabric is designed with an irregular grain for high reflectivity and uniform light distribution.
- Attach the softbox to the top of the tripod stand. Use the rotate button to fix the softbox securely to the tripod.

**5. Attach White Soft Cover (Diffuser):**

- For enhanced soft light effect, attach the white soft cover (external diffuser) to the front of the softbox. This diffuser is removable, allowing you to control the level of softness.

**6. Connect to Power:** Plug the 90.55" long power cord into a standard electrical outlet.

## OPERATING INSTRUCTIONS

### Adjusting Light Angle and Softness:

- The lamp holder is 210° adjustable, allowing you to direct the light precisely where needed. Loosen the fastening screw for tilt angle, adjust the softbox to your desired position, and then tighten the screw to secure

it.

- The removable external diffuser provides flexibility in light softness. Use it for a softer, more diffused light, or remove it for a more direct and intense light output.

Image: Illustration showing the 210° adjustable lamp holder and the fastening screw for tilt angle adjustment.

### Optimal Usage:

This lighting kit is ideal for various photography and videography applications, including:

- Portrait photography
- Product photography
- Still life shooting
- YouTube video creation
- Live streaming

- Any scenario requiring professional, soft, and uniform illumination.

Image: Example of the softbox lighting kit being used in a portrait photography setup, demonstrating its ability to provide even lighting.

## MAINTENANCE

- **Cleaning:**

- Ensure the kit is unplugged and cooled down before cleaning.
- Wipe the exterior of the softbox and tripod stand with a soft, dry cloth.
- The white soft cover can be gently hand-washed with mild soap and water if necessary, then air-dried.
- Do not use abrasive cleaners or solvents on any part of the kit.

- **Storage:**

- When not in use, disassemble the kit and store it in a dry, cool place.
- The included carry bag (if applicable) is recommended for transport and storage to protect components.

- **Bulb Replacement:**

- The LED bulb has an approximate lifespan of 10,000 hours.
- When replacing, ensure the kit is unplugged and the bulb is cool. Use only E27 base LED bulbs.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Light not turning on	Power cord not fully plugged in. Bulb not screwed in properly or faulty. Power outlet issue.	Check power connections. Ensure bulb is securely screwed in. Test with another E27 bulb if available. Test the outlet with another device.
Light is too harsh/bright	Diffuser not attached. Light positioned too close to subject.	Attach the white soft cover (diffuser). Move the softbox further away from your subject.
Light is too dim	Diffuser attached (if not desired). Light positioned too far from subject. Bulb nearing end of life.	Remove the white soft cover (diffuser). Move the softbox closer to your subject. Replace the LED bulb.
Tripod unstable	Legs not fully extended or locked. Height extended too far for stability.	Ensure all three legs are fully extended and locked using the rotate buttons. Lower the height of the tripod stand.

## SPECIFICATIONS

Feature	Detail
