MAINTENANCE

Battery Care

- To prolong battery lifespan, avoid completely draining the power bank. It is recommended to recharge it when the battery level is between 20% and 80%.
- Store the power bank in a cool, dry place away from direct sunlight and extreme temperatures.
- If storing for an extended period, recharge the power bank every 3-6 months to maintain battery health.

Cleaning

Wipe the power bank with a soft, dry cloth. Do not use harsh chemicals or abrasive materials, as these may damage the surface.

TROUBLESHOOTING

- **Power Bank Not Charging:**
 - Ensure the charging cable is securely connected to both the power bank's IN/OUT1 port and the power adapter.
 - Verify that the wall outlet is functional.
 - Try a different USB-C cable and power adapter to rule out faulty accessories.
- **Device Not Charging from Power Bank:**
 - Check if the power bank has sufficient charge (refer to the digital display).
 - Ensure the charging cable is securely connected to both the power bank and your device.
 - Try a different charging cable or a different output port on the power bank.
 - Confirm your device is compatible with the power bank's output specifications.
- **Slow Charging:**
 - Ensure you are using a fast-charging compatible cable and your device supports fast charging.
 - When charging multiple devices simultaneously, the total output power is shared, which may result in slower charging for individual devices.
 - For optimal fast charging, use the IN/OUT1 (65W) USB-C port for high-power devices like laptops.
