1. Align the power bank with the back of your MagSafe-compatible iPhone.
2. The magnets will automatically snap the power bank into place, ensuring proper alignment for wireless charging.

## OPERATING INSTRUCTIONS

## 1. Wireless Charging (MagSafe)

To charge your iPhone wirelessly:

**Figure 3:** Wireless Charging in Progress. This image shows an iPhone receiving a wireless charge from the power bank, indicated by the charging animation on the phone screen.

1. Attach the power bank to the back of your MagSafe-compatible iPhone.
2. Press the power button on the side of the power bank. Wireless charging will begin within 5 seconds.
3. The LED indicators on the power bank will show its remaining charge. Your iPhone screen will also indicate charging.
4. To stop charging, simply detach the power bank or press the power button again.

**Figure 5:** Wired Charging via USB-C. This image shows the power bank connected to a phone using a USB-C cable, demonstrating its faster wired charging capability.

1. Connect one end of a USB-C cable (or a compatible cable for your device) to the USB-C port on the power bank.
2. Connect the other end to your device's charging port.

3. Charging will typically begin automatically. If not, press the power button on the power bank.

3. Checking Battery Level

Press the power button once to check the remaining battery level indicated by the LED lights.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the surface of the power bank. Do not use liquid cleaners or aerosols.
- **Storage:** Store the power bank in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, fully charge the power bank at least once every three months if not in regular use.

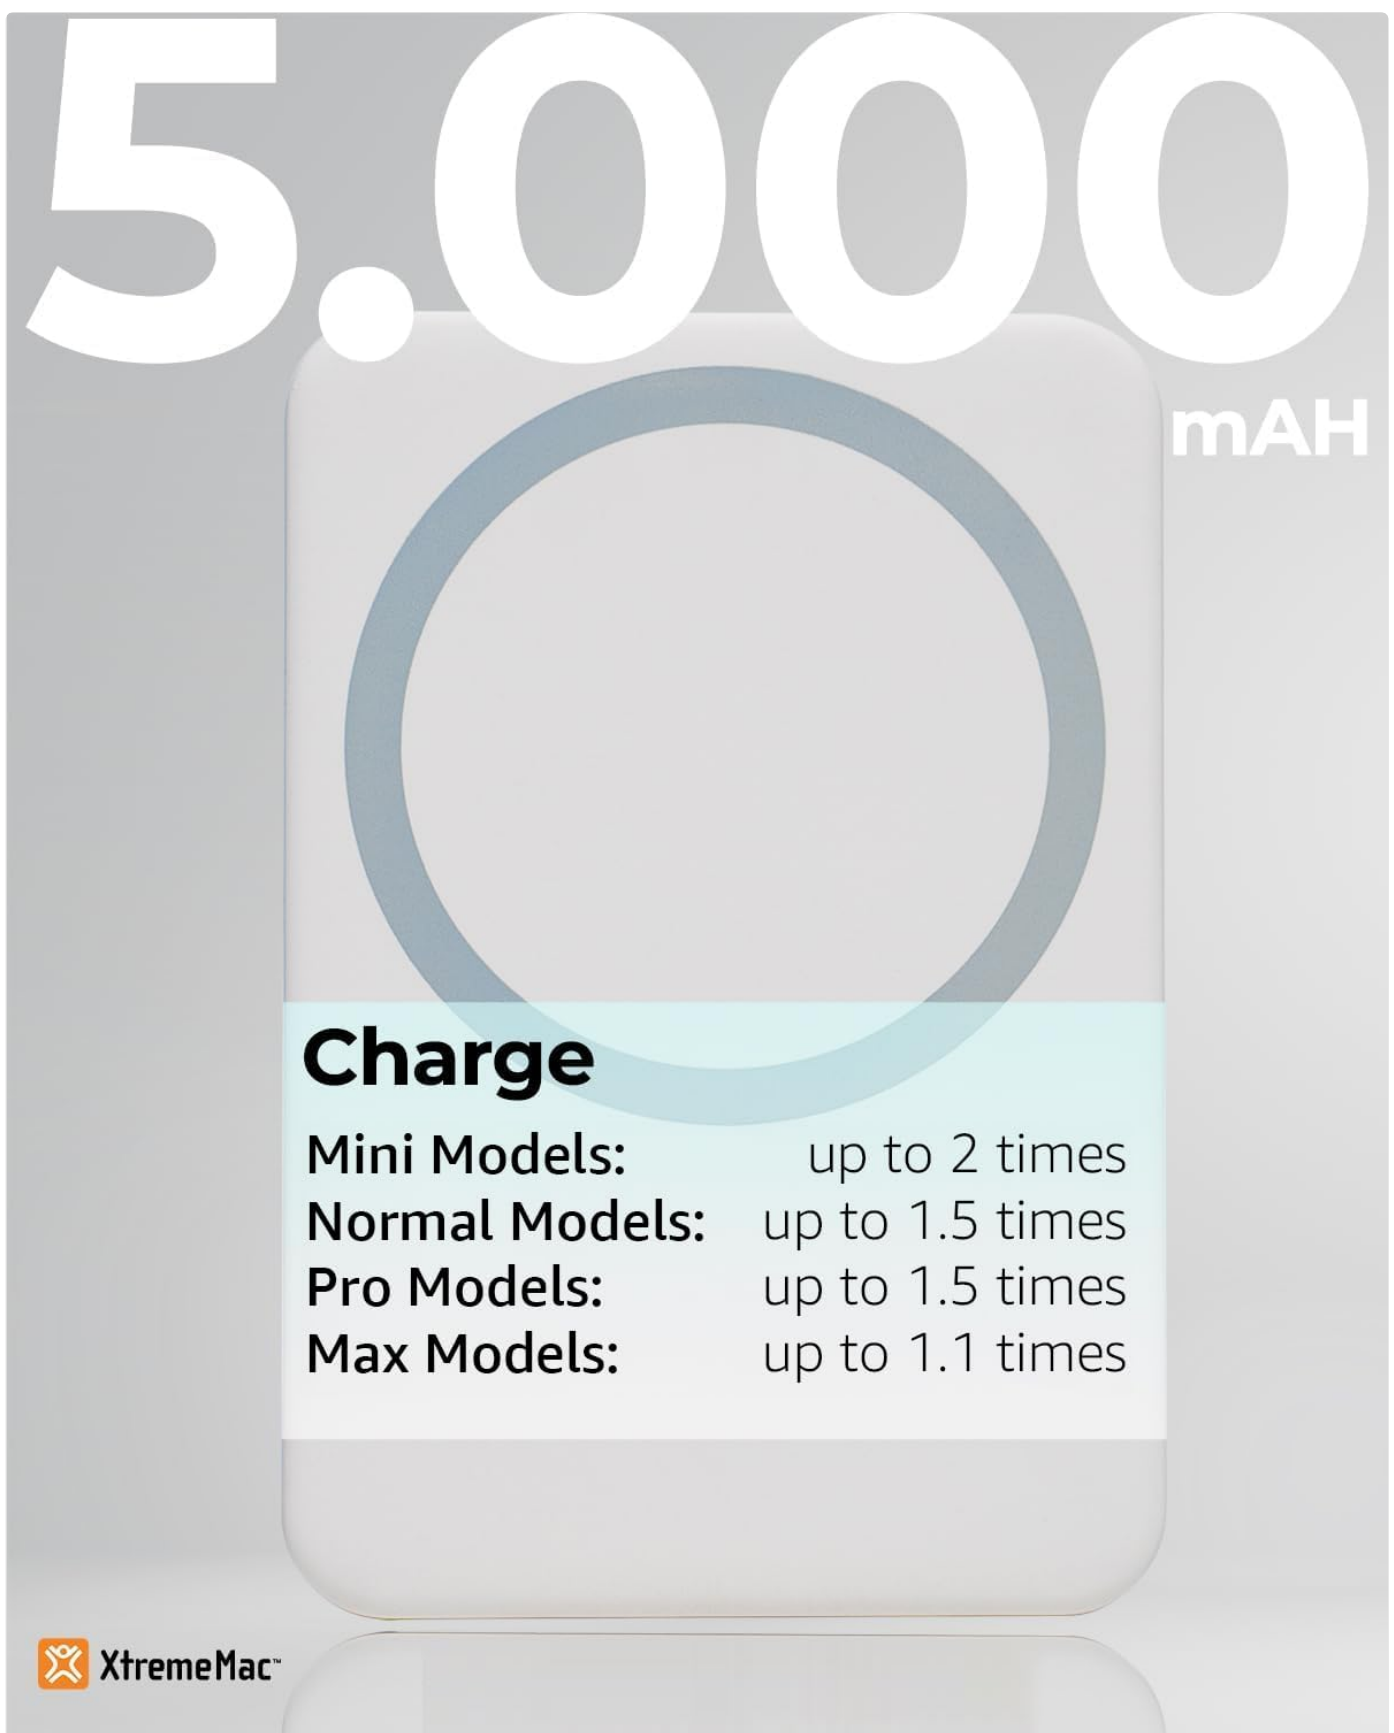

TROUBLESHOOTING

| Problem                         | Possible Cause   | Solution   |
|---------------------------------|--|--|
| Power bank not charging.        | Cable not connected properly; faulty cable/adaptor; power bank fully charged.                  | Ensure cable is securely connected. Try a different USB-C cable and power adapter. Check LED indicators; if all are solid, it's fully charged.             |
| Device not charging wirelessly. | Device not MagSafe compatible; misaligned; power bank low on charge; power button not pressed. | Ensure your device is MagSafe compatible (iPhone 12/13/14/15 series). Realign the power bank. Recharge the power bank. Press the power button to activate. |
| Device not charging via cable.  | Cable not connected properly; faulty cable/device; power bank low on charge.                   | Ensure cable is securely connected. Try a different cable. Recharge the power bank.  |
| Slow charging.                  | Using a non-PD charger/cable; device case interfering with wireless charging.                  | For wired charging, ensure you are using a USB-C PD compatible charger and cable. For wireless, remove thick or metallic phone cases.                      |
