Full assembly is required for this loft bed. It is recommended that **two people** perform the assembly to ensure safety and ease of construction. All necessary tools are included.

1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out on a clean, soft surface (e.g., a carpet or blanket) to prevent scratching. Refer to the parts list (not provided in this manual, but typically included with the product) to identify each piece.
2. **Assemble Bed Ends:** Attach the side rails to the headboard and footboard posts using the provided hardware. Ensure all connections are secure but do not fully tighten until the entire frame is assembled.
3. **Connect Bed Ends:** Join the assembled bed ends with the long side rails. This will form the main frame of the loft bed.

7. **Final Tightening:** Once all components are in place and aligned, systematically tighten all screws and bolts. Do not overtighten.

- **Ladder Use:** Always use the ladder for safe access to and from the loft bed. Do not climb on the bed frame directly.
