SETUP AND ASSEMBLY

Assembly of the VECELO Twin Metal Platform Bed Frame is designed to be straightforward. It is recommended to assemble the bed frame with two people.

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a clean, soft surface (like a carpet) to prevent scratches. Refer to the parts list in your assembly kit to identify each piece.
2. **Assemble the Headboard and Footboard:** Attach the vertical and horizontal bars of the headboard and footboard sections using the provided screws and tools. Ensure all connections are snug but do not overtighten initially.
3. **Connect Side Rails:** Attach the long side rails to the assembled headboard and footboard. Use the designated bolts and tighten them securely.
4. **Install Center Support Legs:** If applicable, attach any central support legs to the main frame. These provide additional stability.

5. **Place Metal Slats:** Position the metal slats across the frame. The unique snap structure design allows for quick locking of the slats into place. Ensure each slat is properly seated and secured to prevent movement and noise.
6. **Final Tightening:** Once all components are in place, go back and fully tighten all screws and bolts. This ensures the frame's stability and prevents squeaking.

- **Mattress Placement:** Carefully place your twin-sized mattress directly onto the metal slats. Ensure the mattress is centered and fully supported by the frame.
- **Under-Bed Storage:** The frame provides approximately 12.6 inches of clearance underneath, ideal for storing boxes, bins, or other items to maximize space in your room.

MAINTENANCE

To ensure the longevity and appearance of your bed frame, follow these simple maintenance tips:

- **Cleaning:** Wipe the metal frame with a dry cloth to remove dust and dirt. Avoid using harsh chemicals or abrasive cleaners, which can damage the finish.
- **Regular Inspection:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten any loose fasteners to maintain stability and prevent squeaking.
- **Weight Distribution:** Distribute weight evenly across the bed frame to prevent undue stress on specific areas.
