ZAGG InvisibleShield Glass Elite Privacy 360 Screen Protector for iPhone 15 Pro Max User Manual

Model: iPhone 15 Pro Max
Brand: ZAGG

Introduction	Setup	Operating	Maintenance	Troubleshooting	Specifications	Warranty & Support

1. INTRODUCTION

The ZAGG InvisibleShield Glass Elite Privacy 360 Screen Protector is designed to provide robust protection and privacy for your iPhone 15 Pro Max. This screen protector offers five times the strength of traditional glass, reinforced edges for chip and crack resistance, and a four-way privacy filter to shield your screen from prying eyes in both portrait and landscape orientations. It also features a ClearPrint surface treatment to minimize fingerprints and an anti-microbial treatment to inhibit bacterial growth. The EZ Apply installation process ensures a straightforward, bubble-free application.

2. SETUP AND INSTALLATION

Follow these steps for a precise and bubble-free installation of your InvisibleShield Glass Elite Privacy 360 screen protector.

2.1 Included Items

- InvisibleShield Glass Elite Privacy 360 Screen Protector
- EZ Apply Installation Tray
- Wet Cleaning Wipe (Alcohol Prep Pad)
- Microfiber Cleaning Cloth
- Dust Removal Sticker
- Installation Mat (optional, for stability)

2.2 Preparation

1. **Power Off Device:** Turn off your iPhone 15 Pro Max to prevent accidental touches and ensure a clean installation surface.
2. **Clean Screen:** Use the provided wet cleaning wipe to thoroughly clean your device's screen, removing all smudges, oils, and dirt.
3. **Dry Screen:** Follow up with the microfiber cleaning cloth to dry the screen completely. Ensure no moisture remains.
4. **Remove Dust:** Use the dust removal sticker to pick up any remaining lint or dust particles that may have settled on the screen. Carefully inspect the screen from different angles to ensure it is spotless.

2.3 Screen Protector Application

5. **Place Phone in Tray:** Place your iPhone 15 Pro Max into the EZ Apply Installation Tray. Ensure the phone is securely seated and properly aligned within the tray.
6. **Prepare Screen Protector:** Hold the InvisibleShield Glass Elite Privacy 360 screen protector by its edges. Locate the tab marked "1" and carefully peel off the protective backing to expose the adhesive side. Avoid touching the adhesive.
7. **Align and Apply:** Align the screen protector with the installation tray and the phone's screen. Ensure the camera cutout is properly positioned. Gently lower the screen protector onto the phone's screen.
8. **Press to Adhere:** Once aligned, press firmly in the middle of the screen protector and watch as it adheres to the screen. Use your thumbs to gently press out any remaining air bubbles, working from the center outwards.
9. **Remove Top Liner:** Carefully remove the top protective liner from the screen protector.
10. **Remove Installation Tray:** Gently remove the EZ Apply Installation Tray from your phone.
11. **Final Clean-up:** Use the microfiber cloth to wipe away any fingerprints or remaining smudges.

2.4 Installation Video

For a visual guide on the installation process, please watch the official ZAGG installation video below.

Video Description: Official ZAGG Glass Elite Family Installation Guide. This video demonstrates the step-by-step process of cleaning the phone screen, using the EZ Apply tray for alignment, and applying the InvisibleShield Glass Elite screen protector to ensure a perfect, bubble-free fit. It covers preparing the screen, aligning the protector, and removing any air bubbles.

3. OPERATING INSTRUCTIONS

The InvisibleShield Glass Elite Privacy 360 is designed for seamless integration with your iPhone 15 Pro Max, offering enhanced privacy and touch responsiveness.

3.1 4-Way Privacy Filter

This screen protector features a 4-way privacy filter, which means your screen content is visible only to you when viewed directly. From side angles (both portrait and landscape), the screen appears dark, preventing others from viewing your private information. This is ideal for public spaces, commuting, or any situation where visual privacy is desired.

Powerful scratch & impact protection

Advanced glass formulation

5x stronger
Strong shatter protection with advanced glass

Strong scratch protection
Protects your screen from scratches

Edge-to-edge protection
Protects the corners and edges of the screen from chips and cracks

Image Description: An iPhone with the ZAGG InvisibleShield Glass Elite Privacy 360 screen protector applied. The image illustrates how the screen appears dark and unreadable when viewed from an angle, demonstrating the 4-way privacy filter in action.

3.2 Touch Sensitivity

The screen protector is engineered to maintain your device's original touch sensitivity. You should experience smooth and accurate responses to all screen interactions. If you notice any reduction in touch sensitivity, ensure the screen protector is properly installed and free of air bubbles or debris.

3.3 Brightness Adjustment

Due to the privacy filter, your screen may appear slightly darker than usual. For optimal viewing, you might need to adjust your device's brightness settings to a higher level. This is normal for privacy screen protectors and helps ensure the effectiveness of the privacy feature.

4. MAINTENANCE

Proper care will extend the life and effectiveness of your InvisibleShield Glass Elite Privacy 360 screen protector.

4.1 Cleaning the Screen Protector

The ClearPrint surface treatment helps disperse fingerprint oils, keeping your screen smudge-free. For routine cleaning, gently wipe the screen protector with a clean, soft, lint-free cloth. For more stubborn marks, lightly dampen the microfiber cloth with water or a screen-safe cleaner and wipe the surface.

4.2 Anti-Microbial Treatment

The screen protector features an anti-microbial treatment that protects it by inhibiting the growth of odor-causing agents and guarding against the degradation of the screen protector by microorganisms. This treatment is

integrated into the glass and does not require special maintenance.

5. TROUBLESHOOTING

Here are solutions to common issues you might encounter with your screen protector.

5.1 Air Bubbles After Installation

Small air bubbles may disappear naturally within 12-24 hours. For larger or persistent bubbles, use the microfiber cloth to gently push them towards the nearest edge of the screen protector. Apply steady pressure to work the air out.

5.2 Dust or Lint Trapped Underneath

If dust or lint is trapped under the screen protector, carefully lift the nearest corner of the screen protector using a dust removal sticker or a piece of tape. Use another dust removal sticker to gently dab the underside of the screen protector and the phone screen to remove the particle. Reapply the screen protector slowly, ensuring proper alignment.

5.3 Reduced Touch Sensitivity

Ensure the screen protector is fully adhered to the screen without any gaps or large air bubbles. If the issue persists, try adjusting your phone's touch sensitivity settings if available, or consider reinstalling the protector after a thorough cleaning.

6. SPECIFICATIONS

Product Dimensions	6 x 3.5 x 0.5 inches (6"L x 3.5"W)
Item Weight	2.89 ounces
Item Model Number	200111613
Compatible Phone Models	iPhone 15 Pro Max
