

## KoolMore KM-RPPS-3DSS

# KoolMore KM-RPPS-3DSS 92-inch Three-Door Commercial Pizza Prep Table User Manual

Model: KM-RPPS-3DSS

Brand: KoolMore

## INTRODUCTION

This manual provides essential instructions for the safe and efficient operation, installation, and maintenance of your KoolMore KM-RPPS-3DSS Commercial Pizza Prep Table. Please read this manual thoroughly before installation and use, and retain it for future reference. This unit is designed for commercial food preparation and storage, featuring a refrigerated topping station, a built-in cutting board, and cold storage beneath.

## SAFETY INFORMATION

Always follow basic safety precautions when using this appliance to reduce the risk of fire, electric shock, or injury.

- Ensure the unit is properly grounded.
- Do not operate with a damaged power cord or plug.
- Keep ventilation openings clear of obstructions.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- Only qualified personnel should perform repairs.
- This appliance uses R290 refrigerant. Handle with care and ensure proper ventilation during servicing.

## SETUP AND INSTALLATION

### Unpacking

Carefully remove all packaging materials. Inspect the unit for any shipping damage. Report any damage immediately to the carrier and supplier. Retain packaging materials for inspection.

### Placement

- Place the unit on a strong, level surface capable of supporting its weight (approximately 565 lbs).
- Ensure adequate clearance around the unit for proper ventilation, especially around the compressor compartment.
- Avoid direct sunlight or proximity to heat-generating equipment.

- The unit is equipped with rolling casters for easy positioning. Lock the casters once the unit is in its final location.

## Electrical Connection

Connect the unit to a dedicated 120 Volt, 60 Hz, single-phase grounded electrical outlet. Do not use extension cords or adapter plugs. Ensure the electrical supply matches the requirements specified on the unit's data plate.

## Initial Cleaning

Before initial use, clean the interior and exterior surfaces with a mild soap and water solution. Rinse thoroughly and dry. Install the included shelves.

## OPERATING INSTRUCTIONS

---

### Powering On

After installation and initial cleaning, plug in the unit. The digital temperature controller will display the current internal temperature. Allow the unit to run for several hours to reach the desired operating temperature before loading with food products.

### Temperature Control

The unit is designed to maintain temperatures between 33°F and 40°F (0.5°C and 4.4°C). Adjust the temperature using the digital controller located on the front of the unit. Refer to the controller's specific instructions for detailed programming.

### Food Pan Usage

The top rail accommodates up to twelve food pans (sold separately). Place prepared ingredients in these pans for easy access during food preparation. Ensure the food protection lids are closed when the pans are not actively in use to maintain cold temperatures and food safety.

### Cutting Board

Utilize the integrated 92-inch cutting board for food preparation tasks. Keep the cutting board clean and sanitized between uses to prevent cross-contamination.

### Refrigerated Storage

The three-door refrigerated compartment below the work surface provides additional cold storage. Organize items on the adjustable wire shelves. Ensure doors are closed securely after each access to maintain internal temperatures.

Image: Interior view of the KoolMore KM-RPPS-3DSS pizza prep table with all three doors open, revealing the wire shelves inside.

## MAINTENANCE

### Daily Cleaning

- Clean the cutting board and food pan area with a food-safe cleaner and sanitizer.
- Wipe down all stainless steel surfaces with a damp cloth and mild detergent. Dry thoroughly to prevent water spots.

### Weekly/Monthly Cleaning

- Clean the interior of the refrigerated compartments, including shelves.
- Inspect door gaskets for tears or damage and clean them to ensure a proper seal.
- Clean the condenser coil (located in the compressor compartment) to ensure efficient operation. This should be done by qualified personnel or by following specific instructions in a more detailed service manual. A dirty condenser coil can lead to increased energy consumption and reduced cooling performance.

### Defrost System

This unit features an automatic defrost system. Ice buildup on the evaporator coil will be periodically melted and drained. Ensure the drain line is clear and free of obstructions.

### TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit not cooling	No power supply	Check power cord and circuit breaker.
	Temperature set too high	Adjust temperature setting.
	Dirty condenser coil	Clean condenser coil (refer to maintenance).
	Door left open	Ensure doors are closed properly.
Excessive noise	Unit not level	Level the unit using the casters.
	Loose components	Contact qualified service personnel.
Water on floor	Clogged drain line	Clear drain line.
	Excessive humidity	Ensure doors are not left open frequently.

For issues not listed or if troubleshooting steps do not resolve the problem, contact KoolMore customer support or a qualified service technician.

### SPECIFICATIONS

Model Number	KM-RPPS-3DSS
Dimensions (D x W x H)	31.49 x 91.88 x 39.44 inches
Item Weight	565 pounds
Capacity	24 Cubic Feet
Voltage	120 Volts
Annual Energy Consumption	625 Kilowatt Hours
Temperature Range	33°F - 40°F
Refrigerant	R-290
Defrost System	Automatic

Number of Doors	3
Shelves	3 (Wire)
Material Type	Stainless Steel
Certification	ETL Listed
