## 2. SETUP

### Unpacking:

Carefully remove the freezer from its packaging. Inspect for any damage during transit. Remove all protective films and tapes from the exterior and interior of the unit.

### Placement:

Place the freezer on a firm, level surface. Ensure adequate ventilation around the unit. The adjustable feet can be used to stabilize the freezer on uneven floors.

### **Initial Power-On:**

After placing the freezer in its desired location, allow it to stand upright for at least 24 hours before plugging it into a power outlet. This allows the refrigerant to settle, preventing potential damage to the cooling system.

## **3. OPERATING INSTRUCTIONS**

---

### **Temperature Control:**

The freezer features a mechanical thermostat with 7 temperature settings. Rotate the dial to select the desired cooling level. Higher numbers indicate colder temperatures for deep freezing, while lower numbers are suitable for refrigeration or fresh-keeping.

## 4. MAINTENANCE

### Defrosting:

This is a manual defrost freezer. When frost accumulates to a thickness of 1/4 inch (6 mm) or more, it is

recommended to defrost the unit. To defrost, unplug the freezer, remove all contents, and open the drain plug located at the bottom of the unit to allow water to escape. Use the provided frost scraper to gently remove ice buildup. Do not use sharp objects.

### Cleaning:

Regularly clean the interior and exterior of the freezer with a mild detergent and warm water. Ensure the unit is unplugged before cleaning. Wipe dry with a soft cloth.

## 5. TROUBLESHOOTING

If your freezer is not operating correctly, please check the following common issues before contacting customer service:

- **Freezer not cooling:** Ensure the power cord is securely plugged in and the power outlet is functional. Check the temperature setting; it might be set too high.
- **Excessive noise:** Verify the freezer is on a level surface. Ensure there is adequate clearance around the unit for proper ventilation.
- **Excessive frost buildup:** This is a manual defrost unit. Regular defrosting is required. Ensure the door seal is intact and the door is closed properly.
