### 3. SETTING THE TIME AND DATE

To ensure accurate timekeeping and date display, follow these steps:

#### 1. Setting the Time:

- Pull the crown (2) out to the **second gear** position.
- Rotate the crown clockwise or counter-clockwise to set the hour and minute hands to the correct time.
- Once the time is set, push the crown back into its original position.

#### 2. Setting the Date:

- Pull the crown (2) out to the **first gear** position.
- Rotate the crown to adjust the date display.
- Once the date is set, push the crown back into its original position.

### 4. OPERATING THE CHRONOGRAPH

Your RORIOS watch features a chronograph function for measuring elapsed time. The subdials typically display seconds, minutes, and 24-hour time.

- **Starting the Chronograph:** Press the Start/Stop button (1) to begin timing. The chronograph second hand will start moving.
- **Pausing the Chronograph:** Press the Start/Stop button (1) again to pause the timing. The chronograph hands will stop, allowing you to read the elapsed time.
- **Resuming the Chronograph:** Press the Start/Stop button (1) once more to resume timing from where it was paused.
- **Resetting the Chronograph:** While the chronograph is stopped (either paused or after stopping), press the Reset button (3) to return all chronograph hands to their zero positions.

## 5. CARE AND MAINTENANCE

Proper care will help maintain the appearance and functionality of your RORIOS watch.

### Water Resistance

This watch is designed for daily life waterproof use. This means it can withstand:

- Rain exposure
- Sweat
- Hand-washing

**Important:** It is not suitable for swimming, diving, showering with hot water, or prolonged submersion in water. Do not operate the crown or buttons while the watch is wet or submerged.

### Cleaning

Wipe the watch case and strap regularly with a soft, dry cloth to remove dirt and moisture. For the leather strap, avoid excessive moisture and direct sunlight to prevent damage.

### Battery

The watch is powered by a quartz battery. When the watch stops or the second hand moves erratically, it may indicate a low battery. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and function.

## 7. TROUBLESHOOTING

If you encounter any issues with your watch, please refer to the following common problems and solutions:

- **Watch Not Running:**
  - Check if the crown is fully pushed in.
  - The battery may be depleted. Contact a professional for battery replacement.
- **Date Not Changing:**
  - Ensure the crown is in the first gear position when setting the date.

- The date changes automatically over a 24-hour cycle. If you set the time between 9 PM and 3 AM, the date might not change correctly. Adjust the time outside this window.

- **Chronograph Hands Not Resetting to Zero:**

- Ensure the chronograph is stopped before pressing the reset button (3).
- If hands are misaligned, consult a watch repair specialist for adjustment.
