## 6. TROUBLESHOOTING

---

If you encounter issues with your FX-Audio FX03, refer to the following common problems and solutions:

- **No Sound Output:**
  - Ensure all cables (USB-C input, RCA output) are securely connected.
  - Verify the FX03 is selected as the audio output device on your computer or mobile device.
  - Check the volume levels on both your source device and your amplifier/active speakers.
  - Confirm the POWER indicator light on the FX03 is illuminated. If not, check the USB-C power source.

  - Reduce the volume on the source device if the input signal is too strong, causing clipping.
- **Device Not Recognized by Computer:**
  - Try connecting the FX03 to a different USB port on your computer.
  - Restart your computer and reconnect the device.
  - Install necessary drivers if your operating system is not Windows 10 or Android.
