SENSEA 3276007194210

SENSEA Essential Shower System User Manual

Model: 3276007194210

Introduction

Thank you for choosing the SENSEA Essential Shower System. This manual provides important information for the safe and efficient installation, operation, and maintenance of your new shower system. Please read this manual thoroughly before installation and keep it for future reference.
The SENSEA Essential Shower System features a mechanical single-lever mixer, a swiveling overhead shower, and a hand shower with one jet. Designed for durability and ease of use, it is compatible with standard 15/21 mm connections and any hot water system.

Safety Information

Please observe the following safety precautions to prevent injury and damage to the product:

- Ensure all water supply lines are shut off before beginning installation.
- Use appropriate tools and protective equipment during installation.
- If you are unsure about any part of the installation process, consult a qualified plumber.
- Do not use abrasive, acidic, or chlorine-based cleaning agents on the chrome finish, as this may cause damage.
- Regularly check connections for leaks and tighten if necessary.
- Keep small parts out of reach of children.

Package Contents

Verify that all components are present before starting installation. The package should contain:

- Overhead Shower Head (Ø 23 cm)
- Hand Shower
- Shower Bar/Column
- Mechanical Single-Lever Mixer Tap
- Shower Hose (Stainless Steel, 150 cm)
- Mounting Hardware (screws, wall plugs, gaskets, S-connectors)

- Diverter (integrated into mixer handle)

Specifications

Brand	SENSEA
Model Number	3276007194210
Product Dimensions (L x W x H)	53.5 x 28.4 x 78.5-116 cm (adjustable height)
Item Weight	2.93 Kilograms
Main Material	ABS, Stainless Steel

Surface Type	Chrome-plated
Overhead Shower Diameter	Ø 23 cm
Hand Shower Jets	1 (Rain)
Connection Type	Standard 15/21 mm
Compatibility	All hot water systems

Installation Guide

This section provides step-by-step instructions for installing your SENSEA Essential Shower System. Ensure you have all necessary tools before starting.

Tools Required:

- Drill
- Drill bits (appropriate for wall material)
- Pencil
- Measuring tape
- Spirit level
- Adjustable wrench
- Screwdriver
- Sealant tape (PTFE tape)

Installation Steps:

1. **Prepare the Installation Area:** Turn off the main water supply. Ensure the wall surface is clean and suitable for mounting.
2. **Mount the Mixer Tap:**

   a. Apply sealant tape to the threads of the S-connectors. Screw the S-connectors into the wall water outlets, ensuring they are level and the correct distance apart (standard 150mm center-to-center). Tighten securely.

   b. Place the gaskets into the nuts of the mixer tap. Attach the mixer tap to the S-connectors and tighten the nuts with an adjustable wrench. Ensure the mixer is horizontal using a spirit level.
3. **Install the Shower Bar:**

   a. Measure and mark the drilling points for the upper and lower wall brackets of the shower bar. Refer to the dimension diagram for recommended heights. The column is height-adjustable between 78.5 cm and 116 cm to fit existing drill holes.

   b. Drill holes at the marked points. Insert wall plugs into the drilled holes.

   c. Secure the wall brackets to the wall using the provided screws.

   d. Slide the shower bar through the brackets and secure it in place. Ensure it is vertical.
4. **Attach the Overhead Shower:**

   a. Connect the overhead shower arm to the top of the shower bar. Ensure all connections are tight and sealed.

   b. Attach the overhead shower head (Ø 23 cm) to the shower arm. The overhead shower is swiveling for optimal positioning.
5. **Connect the Hand Shower:**

   a. Attach one end of the stainless steel shower hose (150 cm) to the outlet on the mixer tap.

   b. Attach the other end of the hose to the hand shower.

c. Place the hand shower into its adjustable holder on the shower bar.

6. **Test for Leaks:** Slowly turn on the main water supply and check all connections for any leaks. Tighten connections if necessary.

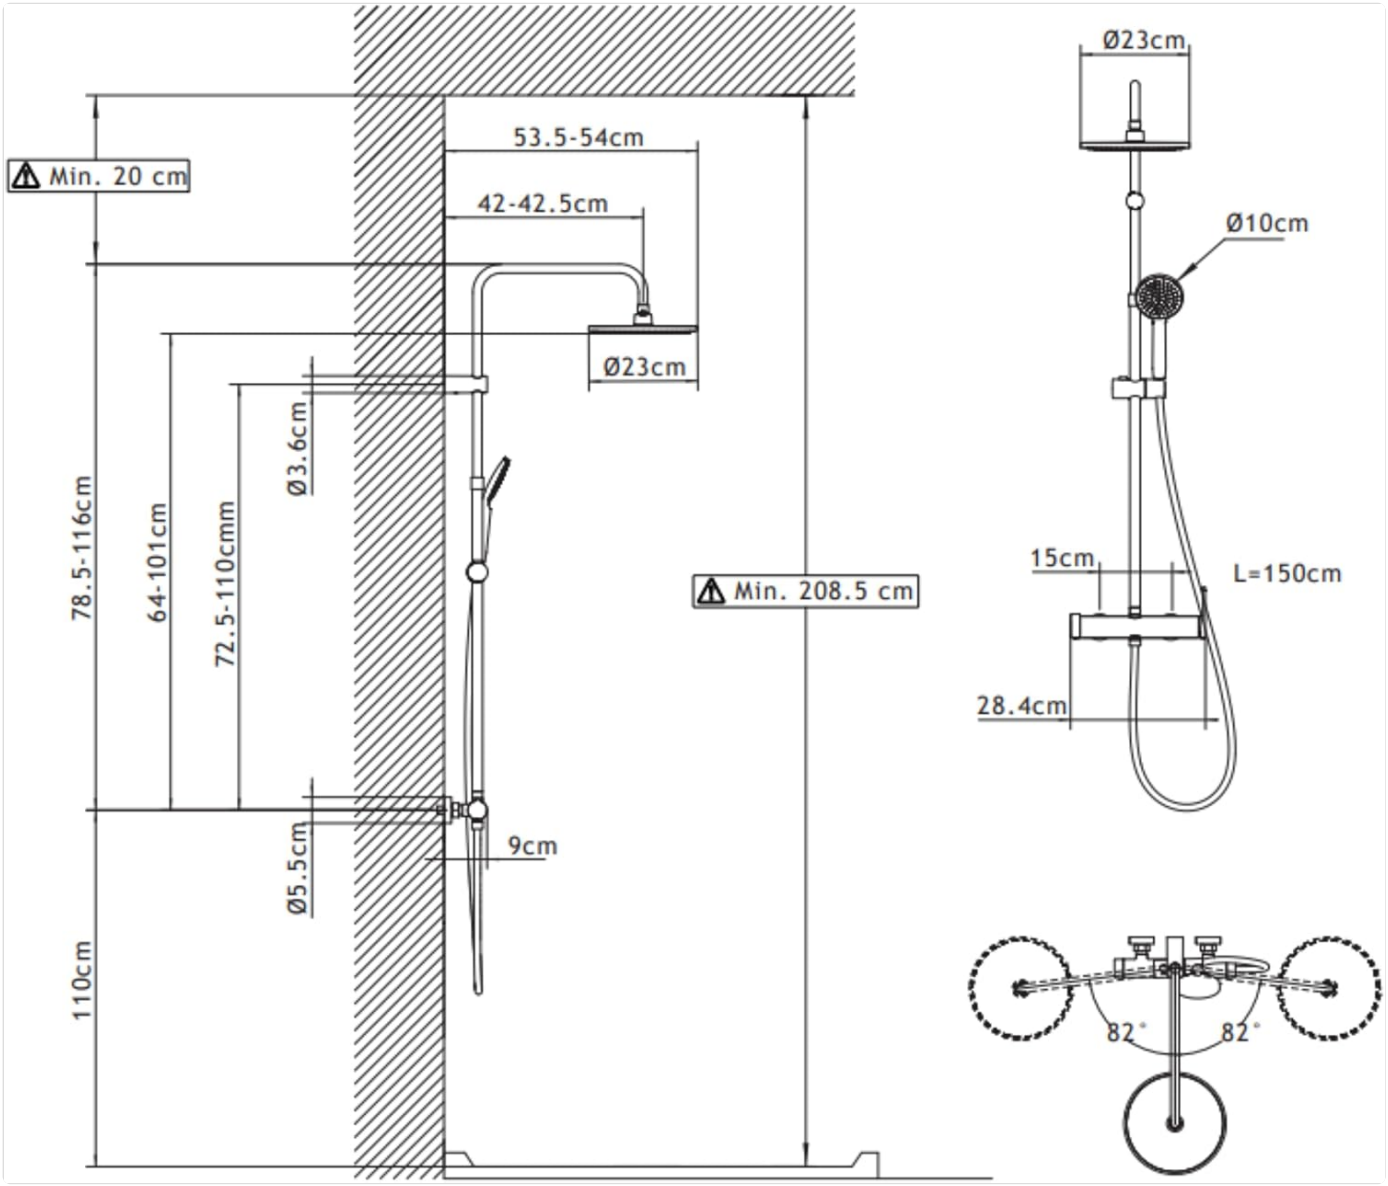

Image: Detailed technical drawing showing the dimensions and recommended installation heights for the shower system, including the mixer tap, shower bar, and overhead shower arm. Minimum clearance of 20 cm from the ceiling and 208.5 cm from the floor is indicated.

Operating Instructions

Using your SENSEA Essential Shower System is straightforward:

- **Water Flow and Temperature:** Use the single-lever mixer handle to control both water flow and temperature. Move the handle left or right for temperature adjustment (hot/cold) and up or down for flow intensity.
- **Diverter Function:** The diverter is integrated into the mixer handle. To switch between the overhead shower and the hand shower, simply pull or push the small button/lever on the mixer handle.
- **Overhead Shower:** The large Ø 23 cm overhead shower provides a soft, consistent rain spray. It can be swiveled to adjust the angle of the water flow.
- **Hand Shower:** The hand shower offers a single jet spray. Its holder on the shower bar is adjustable in height for personal comfort.

Maintenance and Care

Proper care will ensure the longevity and optimal performance of your shower system:

- **Daily Cleaning:** After each use, wipe the shower system with a soft, damp cloth to remove water spots and soap residue. This helps maintain the chrome finish.
- **Anti-Limescale Nozzles:** Both the overhead and hand shower heads are equipped with anti-limescale nozzles. To remove any limescale buildup, simply rub your finger over the silicone nozzles.
- **Deep Cleaning:** For more thorough cleaning, use a mild soap solution and a soft cloth. Rinse thoroughly with clean water and dry immediately.
- **Avoid Harsh Cleaners:** **DO NOT** use abrasive cleaners, scouring pads, acidic detergents, or chlorine-based products. These can damage the chrome finish and internal components.
- **Hose Care:** The stainless steel hose is designed to be anti-twist. Avoid excessive pulling or twisting that could strain

the connections.

Troubleshooting

If you encounter any issues with your SENSEA Essential Shower System, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Low water pressure	Clogged shower head nozzles; partially closed shut-off valve; low household water pressure.	Clean anti-limescale nozzles by rubbing them; ensure shut-off valves are fully open; consult a plumber if household pressure is consistently low.
Water leaking from connections	Loose connections; worn or missing gaskets; insufficient sealant tape.	Tighten connections with a wrench (do not overtighten); check and replace gaskets if damaged; reapply sealant tape if necessary.
Difficulty switching between overhead and hand shower	Diverter mechanism stuck due to limescale or debris.	Operate the diverter several times to dislodge debris; if persistent, consider professional cleaning or replacement of the diverter cartridge.
Water temperature inconsistent	Issues with household hot water supply; mixer cartridge malfunction.	Check household hot water system; if problem persists, the mixer cartridge may need inspection or replacement by a qualified professional.

Warranty and Support

SENSEA products are designed for durability and reliability. For information regarding warranty coverage and customer support, please refer to the purchase documentation or contact your retailer. You can also visit the official SENSEA brand store for more information and contact details:
