Figure 2: Overview of controller buttons and features.

- **Action Buttons (A, B, X, Y):** Standard gaming input buttons.
- **Directional Pad (D-Pad):** U-shaped cross key for precise directional input.
- **Left/Right Analog Sticks:** 360° all-round control for movement and camera.
- **Shoulder Buttons (LB, RB):** Top-mounted buttons.
- **Trigger Buttons (LT, RT):** Multi-stage linear triggers for precise input.
- **SELECT / START Buttons:** Standard menu navigation buttons.
- **HOME Button:** For power on/off and one-click wake-up function.
- **Turbo Button:** Activates turbo function for rapid button presses.
- **Charging Port:** USB Type-C port for charging and wired connection.

## SETUP

### 1. Charging the Controller

Before first use, fully charge the controller. Connect the provided Type-C to USB cable to the controller's charging port and the other end to a USB power source (e.g., computer USB port, USB wall adapter).

- A full charge takes approximately 3.5 hours.
- The controller provides up to 25 hours of playtime on a full charge.

Figure 3: Charging and battery life information.

## 2. Connecting the Controller

The DAREU H101X supports both Bluetooth 5.0 wireless and wired USB connections.

### 2.1. Wireless Bluetooth Connection

Ensure the controller is sufficiently charged before attempting a wireless connection. The controller has a connectivity range of up to 30 feet.

1. Turn on the controller by pressing the **HOME** button.
2. Activate Bluetooth pairing mode on the controller (refer to specific platform instructions below).

3. On your device (PC, Mac, Android, iOS, TV), go to Bluetooth settings and search for new devices.
4. Select "DAREU H101X" or a similar name from the list of available devices to pair.
5. Once paired, the indicator lights on the controller will confirm the connection.

**Note:** For PCs without built-in Bluetooth, a Bluetooth adapter is required for wireless mode.

Figure 4: Wireless Bluetooth connection setup.

## 2.2. Wired USB Connection

For a direct and stable connection, use the provided USB Type-C cable.

1. Connect the Type-C end of the cable to the controller.
2. Connect the USB-A end of the cable to an available USB port on your PC, Mac, or compatible device.
3. The controller will be automatically recognized as a wired gamepad. This mode also allows charging while playing.

## OPERATING THE CONTROLLER

### 1. Basic Controls

The DAREU H101X controller features standard gamepad layouts for intuitive control.

- **Analog Sticks:** Use for character movement and camera control.
- **D-Pad:** Ideal for precise directional inputs in fighting games or menu navigation.
- **Action Buttons (A, B, X, Y):** Perform in-game actions such as jumping, attacking, or interacting.
- **Shoulder and Trigger Buttons:** Used for various actions like aiming, shooting, or special abilities. The linear triggers provide nuanced control for racing and shooting games.

Figure 5: Multi-stage linear triggers for enhanced control.

## 2. Turbo Function

The turbo function allows for rapid, continuous pressing of a selected button. This can be useful in action or shooting games.

- Press the **Turbo** button and an action button (A, B, X, or Y) simultaneously to activate turbo for that button.
- There are three adjustable turbo speeds. Refer to the controller's specific button combinations for cycling through speeds.
- To deactivate turbo for a button, press the **Turbo** button and the same action button again.

# TURBO ONE-CLICK BURST

Three-speed, impeccable move, Press turbo key+action key, setting successfully that the indication flashing. The first operation is semi-automatic mode, the second is automatic mode, the third close the burst mode.

Figure 6: Turbo one-click burst feature.

### 3. Dual Vibration Motors

The controller features asymmetric vibration motors in both grips, providing immersive haptic feedback based on in-game events.

- Vibration intensity varies with game feedback, enhancing the sense of impact in fighting games or terrain in racing games.

## ASYMMETRIC DUAL VIBRATION MOTOR RESTORE THE REAL FEELING

The vibration intensity is based on the feedback of the games, fighting and racing games, bringing a real sense of strike and vibration.

Figure 7: Asymmetric dual vibration motors for realistic feedback.

### 4. 6-Axis Gyro Sensor

The built-in 6-axis gyro sensor provides motion control capabilities, assisting with fast and precise targeting and enhancing game immersion, particularly in compatible titles.

Figure 8: Controller demonstrating 6-axis gyro sensor functionality.

## 5. One-Click Wake-up Function

The controller supports a one-click wake-up function for compatible devices, allowing you to quickly resume gameplay without interruption.

- Press the **HOME** button to wake up the controller and connected device.

Continue to play without interruption

Figure 9: Home button for one-click wake-up.

## MAINTENANCE

To ensure the longevity and optimal performance of your DAREU H101X controller, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the controller. For stubborn dirt, slightly dampen the cloth with water. Avoid using harsh chemicals or abrasive cleaners.
- **Storage:** Store the controller in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the controller or subjecting it to strong impacts. Do not disassemble the controller, as this will void the warranty.
- **Battery Care:** Do not expose the battery to high temperatures or dispose of it in fire. If the controller will not be used for an extended period, charge it periodically to maintain battery health.

## TROUBLESHOOTING

If you encounter issues with your DAREU H101X controller, refer to the following common problems and solutions:

| Problem                                | Possible Cause / Solution   |
|--|---|
| Controller does not turn on.           | Battery may be depleted. Connect the controller to a power source using the USB-C cable and charge it.  |
| Cannot connect via Bluetooth.          | Ensure the controller is in pairing mode.<br>Check if Bluetooth is enabled on your device.<br>Remove previous pairings from your device's Bluetooth list and try reconnecting.<br>For PC, ensure you have a Bluetooth adapter if not built-in.<br>Try restarting both the controller and your device. |
| Input lag or unstable connection.      | Ensure you are within the 30ft connectivity range.<br>Minimize interference from other wireless devices.<br>Try connecting via wired USB for a stable connection.   |
| Buttons or joysticks are unresponsive. | Ensure the controller is properly connected.<br>Check if the controller's battery is low.<br>Restart the controller.  |
| Vibration not working.                 | Ensure the game supports vibration feedback.<br>Check in-game settings to ensure vibration is enabled.  |
