## ASSEMBLY INSTRUCTIONS

---

Assembly typically requires two adults and basic household tools (e.g., Phillips head screwdriver, electric drill with appropriate bits for faster assembly). Follow the numbered steps provided in your product's specific assembly manual.

Below is a general overview of the assembly process:

## Step 1: Assemble the Cabinet Base

Begin by assembling the main cabinet structure. Connect the side panels to the base and back panels using the provided hardware. Ensure all connections are secure and aligned.

## OPERATING INSTRUCTIONS

### Opening the Murphy Bed:

1. Ensure the area in front of the cabinet is clear of obstructions.
2. Pull out the large storage drawer at the bottom. This drawer often acts as a central support for the bed platform.
3. Unlatch the face panel of the cabinet.
4. Gently pull the bed platform downwards until it is fully extended and rests on its support legs.
5. Ensure the support legs are securely locked into place.

### Closing the Murphy Bed:

1. Remove any bedding or pillows that would prevent the bed from folding. A tri-fold mattress (up to 6 inches thick) can typically be stored inside.

2. Unlock and fold the support legs back into their stored position.
3. Gently lift the bed platform upwards, guiding it back into the cabinet.
4. Secure the face panel latches.
5. Push the storage drawer back into the cabinet until it is fully closed.

## Using the Charging Station:

The built-in charging station is located on the side of the cabinet. Simply plug your devices into the USB ports or standard outlets as needed. Ensure the bed is connected to a power source for the charging station to function.

## MAINTENANCE

---

Proper care and maintenance will extend the life of your Murphy bed:

- **Cleaning:** For the wood surfaces, wipe with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners. For the mattress, follow the manufacturer's cleaning instructions (e.g., "Dry Clean Only" if applicable to the mattress, though this instruction is for the furniture finish).
- **Hardware Check:** Periodically check all screws, bolts, and connections to ensure they remain tight. Re-tighten if necessary to maintain stability.
- **Mechanism Lubrication:** If the folding mechanism becomes stiff or noisy, apply a small amount of silicone-based lubricant to the moving parts (hinges, pivots).
- **Weight Distribution:** When the bed is open, ensure weight is distributed evenly. Avoid placing excessive weight on the edges or specific points.
- **Top Surface:** The top surface of the cabinet is designed for light decorative items. Avoid placing heavy objects on top, especially in the center, as this can cause bowing and affect the bed's operation.

## TROUBLESHOOTING

---

If you encounter issues with your Murphy bed, refer to the following common solutions:

Problem	Possible Cause	Solution
Bed is difficult to open/close.	Misaligned components, stiff hinges, obstructions.	Check all assembly connections for tightness and alignment. Lubricate hinges with silicone spray. Ensure no bedding or objects are blocking the mechanism.
Bed feels wobbly or creaks.	Loose hardware, uneven floor, damaged components.	Re-tighten all screws and bolts. Ensure the bed is on a level surface. Inspect wood components for cracks or damage; contact customer support if significant damage is found.
Storage drawer does not slide smoothly.	Misaligned drawer slides, debris in tracks, damaged casters.	Check that drawer slides are correctly installed and aligned. Clear any debris from the tracks. Inspect casters for damage.
Charging station not working.	Not plugged in, power outage, faulty unit.	Ensure the bed's power cord is securely plugged into a working wall outlet. Check your home's circuit breaker. If still not working, contact customer support.
