## PRODUCT FEATURES

- **Efficient Cooling System:** Features dual cooling fans with three adjustable speeds (1400RPM, 2200RPM, 3000RPM) to dissipate heat from the Xbox Series S console, extending its lifespan.
- **Dual Controller Charging:** Equipped with two charging docks for Xbox Series S/X controllers, capable of fully charging controllers in 2-3 hours. Includes over current/voltage/heat protection.
- **Rechargeable Batteries:** Comes with two 1400mAh rechargeable batteries, offering up to 40 hours of use per charge and rechargeable up to 1500 times.
- **Dynamic RGB Lighting:** Features an RGB ambient light strip with 15 modes, including 8 dynamic and 7 monochrome options, controlled by an independent switch.

- **Integrated Headphone Hook:** A detachable hook provides convenient storage for your gaming headset, keeping your setup tidy.
- **Additional USB Ports:** Includes two USB ports; one for fast data transfer (USB 2.0) and another for fast charging external devices.

## SETUP INSTRUCTIONS

---

Follow these steps to set up your MENEAA Cooling Stand & Charging Station:

1. **Place the Stand:** Position the cooling stand on a stable, flat surface near your Xbox Series S console and power outlet.
2. **Connect Power:** Connect the provided USB power cable to the stand and then to a suitable USB power source (e.g., console USB port, USB wall adapter).
3. **Install Batteries:** Open the battery compartment of your Xbox Series S controllers. Insert the included 1400mAh rechargeable batteries, ensuring the text on the battery faces upwards. Close the battery compartment.
4. **Charge Controllers:** Place your controllers onto the designated charging docks on the stand. The indicator light will turn red while charging and green when fully charged or in standby.
5. **Position Console:** Carefully place your Xbox Series S console vertically into the central slot of the cooling stand. Ensure it is securely seated.
6. **Attach Headphone Hook:** If desired, attach the headphone hook to the designated slot on the stand for convenient headset storage.

## OPERATING INSTRUCTIONS

---

### Cooling Fan Operation

The cooling stand features dual fans with adjustable speeds to optimize heat dissipation for your Xbox Series S console.

- Locate the fan speed adjustment button on the front of the stand.
- Press the button to cycle through three fan speed gears: Low (1400RPM), Middle (2200RPM), and Fast (3000RPM).
- Select the desired speed based on your console's temperature and ambient conditions. The Fast gear provides maximum cooling but may produce a slight noise.

## Three-Speed Adjustable Fan

Effective heat dissipation  
( Note:maximum gear works best but makes a little noise )

The image shows a top-down view of the cooling stand with two PlayStation 5 consoles inside. The stand has a central fan area with blue light effects. Below the stand, there are two inset images. The left inset shows a comparison of two fans, with a green checkmark and a red 'X' indicating that the cooling stand's fan is superior. The right inset shows a close-up of the fan speed adjustment button and its settings: Slow (1400RPM), Middle (2200RPM), and Fast (3000RPM). To the right of these insets is a line graph showing temperature over time (0 to 70 minutes) for two scenarios: 'with Cooling Stand' (green line) and 'Bare Machine' (red line). The graph shows that the cooling stand significantly reduces the temperature of the console over time, especially during the 40-70 minute period.

Time (min)	with Cooling Stand (°C)	Bare Machine (°C)
0	30	30
10	32	38
20	34	42
30	36	44
40	38	46
50	39	45
60	40	46
70	41	47

### RGB LED Light Modes

Customize the aesthetic of your gaming setup with 15 different RGB lighting modes.

- Locate the independent RGB switch button on the front of the stand.
- Short press the button to cycle through 8 dynamic modes and 7 monochrome modes (red, green, blue, yellow, cyan, purple, white).

- Press and hold the button for 3 seconds to save the current light mode and turn off the lighting.
- The RGB lighting can operate independently of the cooling fan.

*Image: A visual representation of the 15 RGB lighting modes, highlighting both dynamic color effects and individual static color options, along with the control button.*

## Controller Charging

The charging docks provide a convenient way to keep your Xbox Series S/X controllers powered.

- Ensure the rechargeable batteries are correctly installed in your controllers (text facing upwards).
- Place the controllers firmly into the charging slots.
- A red indicator light signifies that the controller is currently charging.
- A green indicator light signifies that the controller is fully charged or in standby mode.

- Charging typically takes 2-3 hours for a full charge.

## MAINTENANCE

To ensure the longevity and optimal performance of your cooling stand, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe down the surface of the stand. Avoid using abrasive cleaners or solvents that could damage the finish.
- **Dust Removal:** Periodically use compressed air to clear any dust accumulation from the fan vents and charging ports to maintain efficient airflow and connectivity.
- **Storage:** When not in use for extended periods, store the stand in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** For optimal battery life, avoid fully discharging the rechargeable batteries

frequently. Charge them regularly.

## TROUBLESHOOTING

If you encounter any issues with your MENEAA Cooling Stand & Charging Station, please refer to the following table for common problems and solutions:

Problem	Possible Cause	Solution
Cooling fan is not operating.	No power, fan switch off, or cable issue.	Ensure the stand is connected to a power source. Check if the fan speed adjustment button has been pressed to activate the fan. Verify the USB power cable is securely connected.
Controllers are not charging.	Batteries incorrectly installed, incompatible batteries, or poor contact.	Ensure the rechargeable batteries are installed with the text facing upwards. Confirm you are using the included 1400mAh batteries or official Xbox Series S/X rechargeable batteries. Re-seat the controllers firmly in the charging docks.
RGB lights are not turning on or changing modes.	No power or RGB switch not activated.	Ensure the stand is powered. Short press the RGB switch button to cycle through modes. If held for 3 seconds, the lights turn off; short press again to reactivate.
USB ports are not functioning.	No power or device incompatibility.	Verify the stand is receiving power. Ensure the connected device is compatible with standard USB 2.0 data transfer or charging specifications.
